NOTICE OF SPECIAL GEOGRAPHIC DEFINITIONS

Changes in the political and geographical definitions of the Soviet Union, Yugoslavia, Czechoslovakia, and Ethiopia have led to inconsistencies in the reporting of data. Information for these republics and the independent states emerging from them are presented in this edition of the *INS Statistical Yearbook* as follows:

Soviet Union — On January 1, 1992, the United States formally recognized 12 independent republics within the former Soviet Union: Armenia; Azerbaijan; Belarus; Georgia; Kazakhstan; Kyrgyzstan; Moldova; Russia; Tajikistan; Turkmenistan; Ukraine; and Uzbekistan. The Soviet Union has officially dissolved as an independent state. Nationality codes have been established for the independent republics in the various INS data bases. However, a code has been retained for the Soviet Union because, while data for fiscal years 1992-97 are generally available for the separate republics, they are not available for all data series. In these cases, data are aggregated and presented for the former Soviet Union and for available republics.

Yugoslavia — On April 7, 1992, the United States formally recognized three independent states within the Socialist Federal Republic of Yugoslavia: Bosnia and Herzegovina, Croatia, and Slovenia. On February 9, 1994, Macedonia was recognized as an independent state. Montenegro and Serbia have asserted the formation of a joint independent state, but this entity has not been formally recognized as a state by the United States. In the view of the United States, the Socialist Federal Republic of Yugoslavia has officially dissolved and no successor state represents its continuation. However, for purposes of statistical reporting, Yugoslavia will be shown to include the four independent states, as well as Montenegro and Serbia, unless otherwise indicated. Nationality codes have been established for the four independent states in the various INS data bases. However, a code has been retained for Yugoslavia because, while data for fiscal years 1993-97 are generally available for the separate states, they are not available for all data series. In these cases, data are aggregated and presented for the former Yugoslavia and for available independent states.

Czechoslovakia — On January 1, 1993, the United States formally recognized two independent republics within the Czech and Slovak Federal Republic (CSFR, or Czechoslovakia): the Czech Republic and Slovak Republic (Slovakia). Czechoslovakia has officially dissolved as an independent republic; however, for purposes of statistical reporting, it will be shown to include the two independent republics unless otherwise indicated. Nationality codes have been established for the two independent republics in the various INS data bases. However, a code has been retained for Czechoslovakia because, while data for fiscal years 1994-97 are generally available for the separate republics, they are not available for all data series. In these cases, data are aggregated and presented for the former Czechoslovakia and for available independent republics.

Ethiopia / Eritrea — On April 27, 1993, the United States formally recognized Eritrea as a sovereign country, independent of Ethiopia. Data for Ethiopia exclude Eritrea unless otherwise indicated.

Name changes for the following countries are reflected in this edition of the *INS Statistical Yearbook*:

Zaire — On May 30, 1997, Zaire was formally recognized as the Democratic Republic of the Congo. This country is shown as Congo, Democratic Republic.

Congo — The conventional long form name for the Congo is the Republic of the Congo. With the change of Zaire to the Democratic Republic of the Congo, the long form names are used for both countries. Congo is shown as Congo, Republic.

Hong Kong — On December 19, 1984, the United Kingdom and China signed a joint declaration on the question of sovereignty over Hong Kong. Under that declaration, China resumed the exercise of sovereignty over Hong Kong on July 1, 1997. Since the Hong Kong Special Administrative Region government enjoys a high degree of political and economic autonomy, Hong Kong continues to be shown separately.

Western Samoa — On August 4, 1997, Western Samoa was formally recognized as Samoa. This country is shown as Samoa.

In addition, there are known cross-reporting problems for certain pairs of countries with similar names or historical associations. These pairs of countries are: the People's Republic of China and Taiwan; the Dominican Republic and Dominica; Nigeria and Niger; Australia and Austria; Netherlands and Netherlands Antilles; and Mauritania and Mauritius. For each pair, persons from one country may be reported as being from the other country.

INTRODUCTION

This edition of the *Yearbook* provides immigration data for 1998 along with related historical information. The major areas covered include: immigrants admitted for legal permanent residence; refugees approved and admitted; asylee cases filed and approved; nonimmigrant admissions (*e.g.*, tourists, students, *etc.*); aliens naturalized; and deportable aliens located and removed.

The statistics for 1998 reflect decreases in immigration, asylum cases received, and persons naturalized. Nonimmigrant admissions, refugee arrivals, and deportable aliens located increased.

Highlights for 1998 include:

- * Legal immigration in 1998 (660,477) was lower than in 1997 (798,378) due primarily to an increase in pending adjustment of status applications.
- * Thirty-eight percent of all immigrants were born in North America (20 percent in Mexico) and 33 percent were born in Asia.
- * Two-thirds of all immigrants intended to reside in six states: California, New York, Florida, Texas, New Jersey, and Illinois.
- * More than one of five immigrants intended to reside in New York City or Los Angeles.
- * Bosnia-Herzegovina surpassed all other countries for refugee arrivals with 30,906 (40.6 percent); the republics of the former Soviet Union accounted for 23,349 (30.6 percent).
- * Naturalizations decreased to less than 500,000 in 1998 due to an increase in applications pending a decision.
- * Thirty-eight percent of persons naturalizing during the 1991-98 period were born in Asia and 37 percent were born in North America.
- * California showed the highest number of naturalizations in 1998, with 154,793 (33.4 percent); New York was second with 47,456 (10.3 percent). The New York City and Los Angeles-Long Beach metropolitan areas accounted for 23 percent of the total.
- * The number of deportable aliens located increased to 1.7 million—nearly 1 percent more than for 1997.
- * More than 55,000 criminal aliens were removed during 1998; Mexico lead all countries of nationality, with nearly 43,000 (77.1 percent).

I. IMMIGRANTS

This section presents information on the number and characteristics of persons who come to the United States for permanent residence, including persons arriving with that status and those adjusting to permanent resident status after entry.

Immigrants, as defined by U.S. immigration law, are persons lawfully admitted for permanent residence in the United States. Other terms used in INS reports to refer to immigrants include: aliens who are granted legal permanent residence; aliens admitted for legal permanent residence; immigrants admitted; and admissions. (See Appendix 3.)

Aliens wishing to become legal immigrants follow one of two paths depending on their residence at the time of application. Aliens living abroad apply for an immigrant visa at a consular office of the Department of State. Once issued a visa, they may enter the United States and become legal immigrants when they pass through the port of entry. Aliens already living in the United States, including certain undocumented immigrants, temporary workers, foreign students, and refugees, file an application for adjustment of status (to legal permanent residence) with INS. At the time they apply for adjustment of status, they may also apply for work permits. Adjustment of status applicants are granted legal permanent residence at the time their applications are approved. New legal immigrants are automatically authorized to work and should receive alien registration cards ("green cards") soon after becoming legal permanent residents.

U.S. Immigration Program

U.S. law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigrants in other categories usually account for relatively few admissions. An exception occurred during 1989-92 when over 2.6 million former illegal aliens gained permanent resident status through the legalization provisions of the Immigration and Reform and Control Act (IRCA) of 1986 (see Appendix 1, p. A.1-19).

Worldwide immigration subject to numerical limits

The Immigration Act of 1990 (see Appendix 1, p. A.1-20) specified a worldwide level of immigration for certain categories of immigrants with an annual limit that could range between 421,000 and 675,000 depending on admissions in the previous year. These categories and their limits (in parentheses) include family-sponsored preferences (226,000

to 480,000), employment-based preferences (140,000) and diversity immigrants (55,000). The family preference limit is equal to the larger of either 226,000 or a calculation consisting of 480,000 minus the previous year's total of immediate relatives of U.S. citizens and two numerically small categories of children plus any unused employment preferences from the previous year (see Appendix 2). The employment preference limit can be higher than 140,000 if family preferences go unused in the previous year.

Other categories of immigrants, for example, asylees, are also subject to some form of numerical or time bound limitation. However, these categories typically involve small numbers of aliens and are covered under other sections of immigration law.

Preference immigrants

Family sponsored preferences consist of four categories: unmarried sons and daughters of U.S. citizens and their children; spouses, children, and unmarried sons and daughters of legal permanent residents; married sons and daughters of U.S. citizens and their spouses and children; and brothers and sisters, including spouses and children, of U.S. citizens ages 21 and over. The employment-based preferences consist of five categories: priority workers; professionals with advanced degrees or aliens of exceptional ability; skilled workers, professionals (without advanced degrees), and needed unskilled workers; special immigrants (e.g., ministers, religious workers, and employees of the U.S. government abroad); and employment creation immigrants or "investors." Spouses and children are also included in the employment preference limit. The 1998 limits are shown in Appendix 2.

The Department of State is responsible for determining the annual limits and visa allocation for preference immigration. A per-country limit is also calculated annually and is limited to 7 percent of the annual total; the limit for dependent areas is 2 percent of the annual total. The maximum number of visas allowed under the preference system in 1998 was 366,000–226,000 for family-sponsored immigrants and 140,000 for employment-based immigrants. Within these overall limits, no more than 25,620 preference

visas could be issued to persons born in any independent country and no more than 7,320 to natives of a dependent area.

Diversity Program

A total of 55,000 visas are available annually to nationals of certain countries under the Diversity Program. Nationals of countries with more than 50,000 numerically limited admissions during the preceding 5 years are excluded from participating in the Diversity Program. Each of the eligible countries is assigned to one of 6 regions and limits are determined by the INS for each region. The limits are calculated annually using a formula based on immigrant admissions during the preceding 5 years and the population total of the region. The maximum visa limit per country is 3,850.

Immigration exempt from worldwide numerical limits

Immigration usually totals much more than the annual worldwide limit for preference and diversity immigrants because some major categories are exempt from the limits. These categories include:

- ◆ Immediate relatives of U.S. citizens;
- ◆ Refugee and asylee adjustments;
- ◆ Certain parolees from the Soviet Union and Indochina;
- ◆ Cancellation of removal; and
- ◆ Aliens who applied for adjustment of status after having unlawfully resided in the United States since January 1, 1982 and certain special agricultural workers. (The application period ended on November 30, 1988; most recipients of this status gained permanent resident status in fiscal years 1989-92.)

Immediate relatives of U.S. citizens are not subject to any numerical limitation. This has been the single largest category of immigrants since 1986 excluding aliens granted legal permanent residence under IRCA.

Refugees are eligible to adjust to legal permanent residence after 1 year of residence in the U.S. without regard to numerical limit. The number of aliens admitted as refugees to the U.S. each year, however, is established by the President in consultation with Congress (see Refugee section). Recent ceilings on refugee admissions were 112,000 in 1995, 90,000 in 1996, 78,000 in 1997, and 83,000 in 1998.

Asylees also must wait 1 year after they are granted asylum to apply for legal permanent residence. Until 1992, there was a limit of 5,000 adjustments per year. The Immigration Act of 1990 increased the limit to 10,000.

Data Overview

The number of immigrants admitted for legal permanent residence in the United States in 1998 was 660,477 (see Chart A). Included in this total were 357,037 aliens previously living abroad who obtained immigrant visas through the U.S. Department of State and became legal permanent residents upon entry into the United States. The remaining 303,440 legal immigrants, including former undocumented immigrants, refugees and asylees, had been living in the United States an average of three years and adjusted status through the INS. Not included in 1998 legal immigration figures are aliens whose adjustment of status applications were pending a decision at INS at the end of the year (see Pending adjustment of status applications section).

More than 660,000 immigrants were granted legal permanent resident status during 1998.

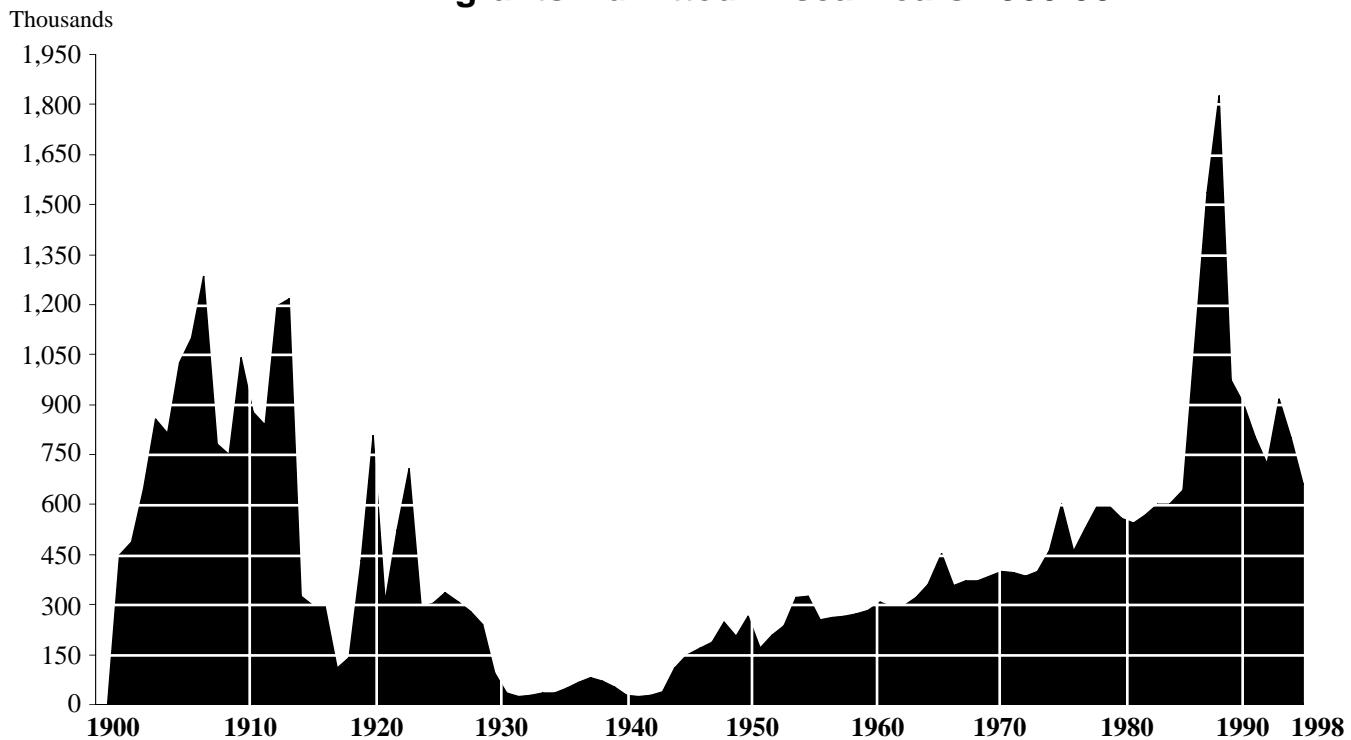

Highlights

- ◆ Legal immigration in 1998 (660,477) was at its lowest level since 1988 (643,025). Fewer immigrants than expected have been admitted for legal permanent residence in recent years as the number of adjustment of status applications pending a decision has grown.
- ◆ During the 1995-98 period, legal immigration would have been an estimated 450,000-550,000 higher than reported if the pending caseload had not increased.
- ◆ The demographic composition of the legal immigrant population, including category of admission, changed very little between 1996-97 and 1997-98. However, the impact of pending adjustment of status applications is unknown.

Pending adjustment of status applications

Between the end of fiscal years 1994 and 1998, the number of adjustment of status applications pending a decision increased 690,000 from 121,000 to 811,000. During this period the number of applications approved failed to keep pace with receipts. Part of the reason for the increase in pending caseload was the Section 245(i) provision of immigration law in effect from October, 1994-January, 1998. This provision shifted the immigrant application workload to INS because it allowed illegal aliens who were previously living in the United States but eligible for legal permanent residence to apply for adjustment of status at a local

INS office. Previously eligible aliens had to leave the country and apply for immigrant visas at Department of State consular offices.

The impact of pending adjustment of status applications on legal immigration during fiscal years 1995-98 was estimated using the same method applied to 1997 data presented in the 1997 *Statistical Yearbook*. For 1995-98, it is estimated that legal immigration would have been 450,000-550,000 higher had pending applications not increased 690,000. The upper bound estimate of 550,000 assumes that 7 percent of applications would have been denied (the historical denial rate) and that 14 percent were family preference applicants (the proportion of all adjustment of status legal immigrants during fiscal years 1995-98), none of whom contributed to the increase in pending caseload. The lower bound estimate of 450,000 takes into account the increase in the family preference limit in 1996 attributable to pending adjustment of status applications in fiscal year 1995.

Ordinarily, family preference adjustment of status applications pending a decision do not decrease legal immigration because of a long waiting list of applicants living abroad. The Department of State regulates immigration under the preference system by issuing visas to aliens on the waiting

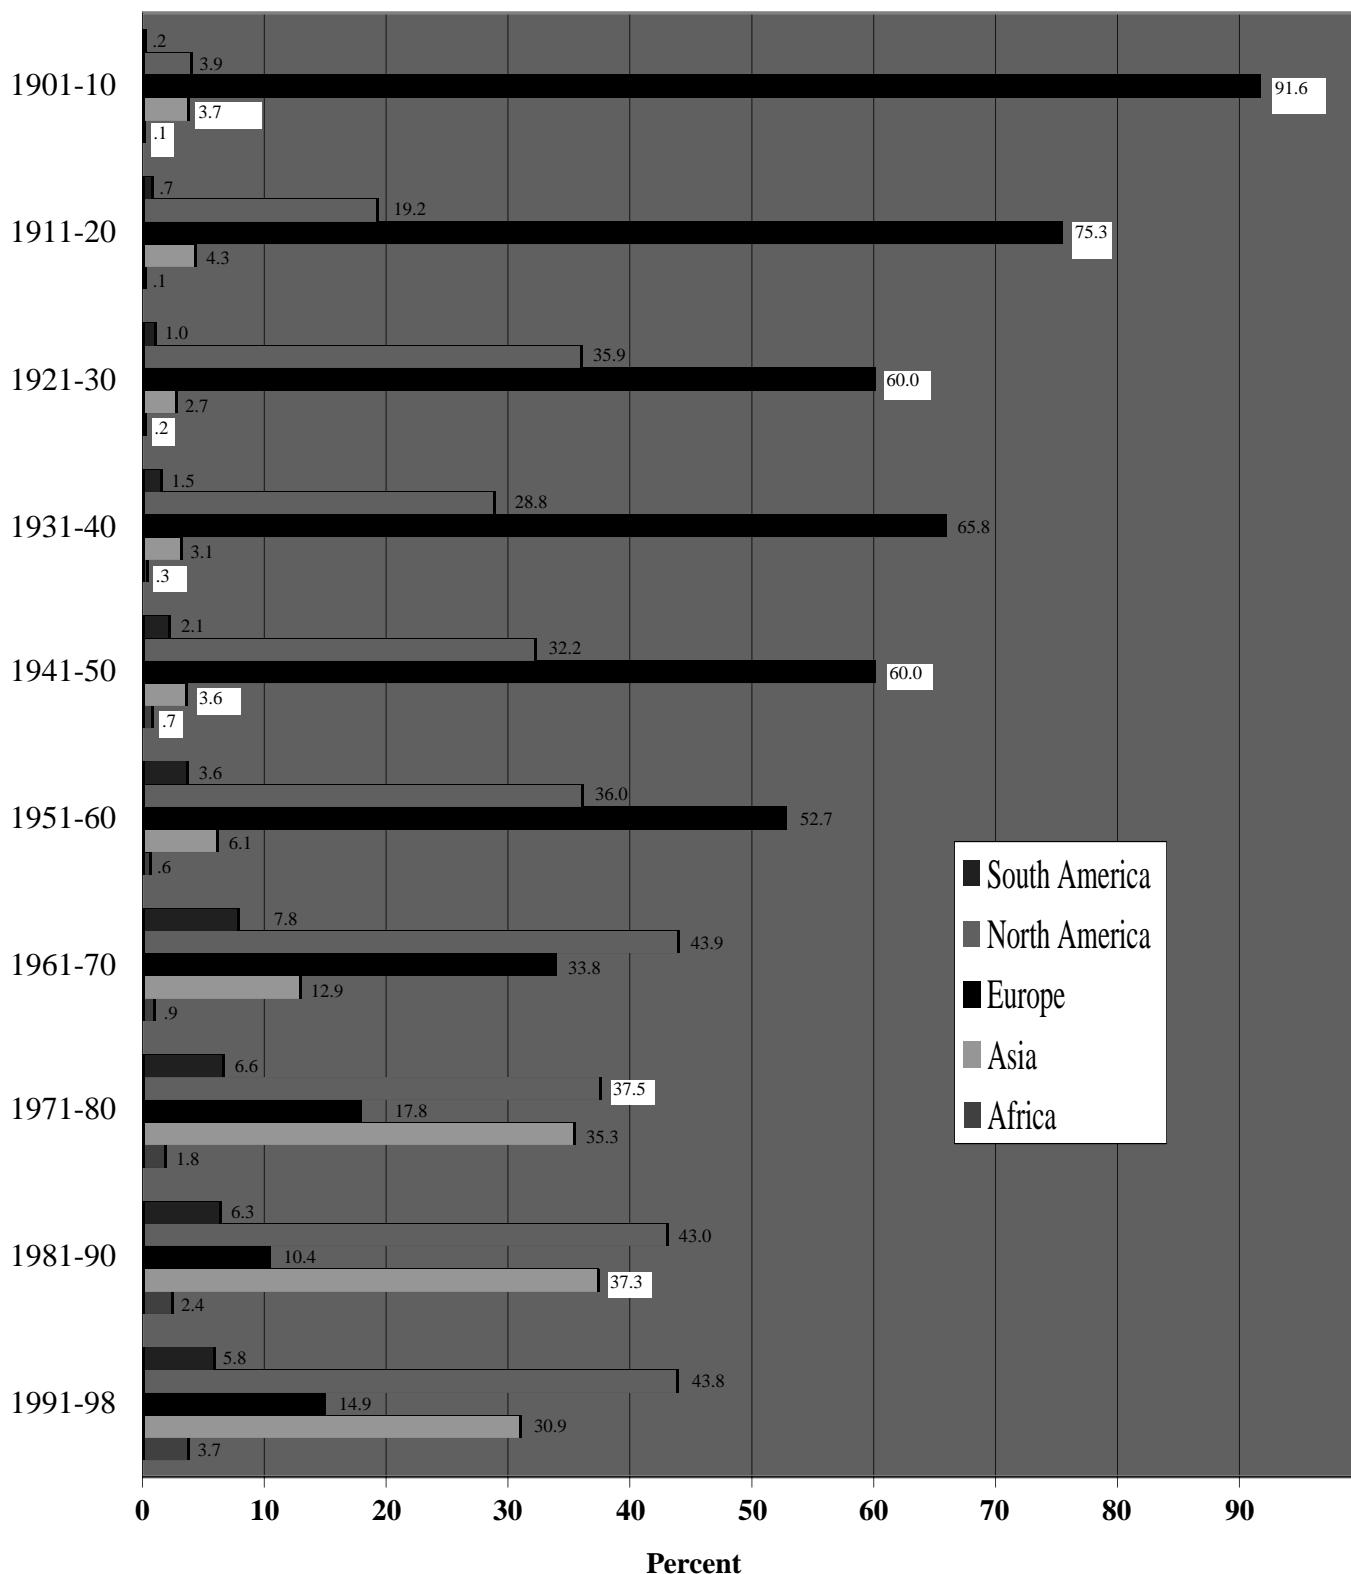

list whenever it appears that the annual limits may not be reached. Unlike family preferences, there is little waiting for most employment preferences, so an increase in pending caseload decreases legal immigration. In fiscal year 1998, however, the Department of State was unable to issue all the family preference visas allowable under the annual limits because of delays in the application process. The delays were caused partly by revisions in the affidavit of support.¹

These calculations suggest that legal immigration might have been 110,000-140,000 higher on average each year during 1995-98 without any increase in pending caseload. It should be noted that this average conceals some known annual variation. Pending adjustment of status applications increased more during fiscal years 1995 and 1997 than during fiscal

¹ Effective December 1997, the affidavit of support, which must be filed primarily for immediate relatives of U.S. citizens and family preferences, became an enforceable contract with household income of sponsors required to be at least 125 percent of the federal poverty guidelines. The additional information required of applicants increased the amount of time it took to complete the application correctly and delayed the adjustment of status application process. However, because of the existing pending caseload, the new affidavit of support rules had minimal effect on adjustment of status approvals in 1998.

year 1996 when the increase in the family preference limit offset much of the loss from pending applications. In 1998, the decline in the number of applications received may have prevented the pending caseload from growing more rapidly.

Understanding the Data

Data Collection

Aliens arriving from outside the United States (new arrivals) generally must have a valid immigrant visa issued by the U.S. Department of State to be admitted for legal permanent residence. Aliens already in the United States in a temporary status who are eligible to become legal permanent residents (adjustments) are granted immigrant status by the U.S. Immigration and Naturalization Service. The source of information on new arrivals is the immigrant visa (OF-155, Immigrant Visa and Alien Registration, U.S. Department of State), and the source of information on adjustments is the form granting legal permanent resident status (I-181, Memorandum of Creation of Record of Lawful Permanent Residence, U.S. Immigration and Naturalization Service).

During fiscal years 1997 and 1998, INS transitioned immigrant application processing from the Immigrant Card Facility (ICF) to the Computer Linked Applicant Information Management System. Most immigrant records for fiscal year 1998 were selected using the date of approval for legal permanent residence. Alternative methods were required for selecting records for certain categories of immigrants, including refugees, asylees, and cancellation of

removal. For these immigrant categories, an earlier or roll-back date, rather than the actual approval date, is stored in the admission/adjustment field for counting the time spent toward meeting the residency requirement for naturalization. Refugee and cancellation of removal cases were selected using the most recent date of data entry as a proxy for the approval date. Asylee cases were selected by adding one year to the date appearing in the admission/adjustment date field since asylees are eligible for naturalization four years after they become legal permanent residents.

The refugee count (44,645) was consistent with the number of approvals (44,829) reported through INS workload statistics, although less than expected based on recent trends in the refugee ceiling, the number of refugee arrivals, and the number of refugee adjustments of status.

Counts for cancellation of removal immigrants (428) and asylees (7,546) were considered too low. The annual limits, 4,000 and 10,000, respectively, were reached during fiscal year 1998 and substituted as estimates. Demographic characteristics for the additional cases (10,000 - 7,546 = 2,454 asylees and 4,000 - 428 = 3,572 cancellation of removal immigrants) were considered to be unknown.

In addition, some of the variables traditionally included in the data extract for legal immigration were not included initially in CLAIMS. This omission, corrected for 1999 data, resulted in missing information for about 100,000 1998 cases for country of chargeability and nationality, marital status, occupation, and nonimmigrant class and year of entry.

Limitations of Data

The number of immigrants admitted for legal permanent residence in a year is not the same as the number of net migrants who entered the United States in that year. The reasons for the difference in counts are:

- 1) Immigrant adjustments are reported in the year the aliens adjust their status to lawful permanent residence and not in the year they migrate to the United States in a temporary or other (refugee or asylee) status.
- 2) Some migrants (such as parolees, refugees, and asylees) may never be counted as lawful permanent residents even though they reside permanently in the United States (they are not required to adjust to permanent resident status).
- 3) Information on emigration (aliens permanently departing the United States) and information on net illegal immigration is not available (see Data Gaps section).

From 1892-1903, aliens entering by cabin class were not counted as immigrants. Land arrivals were not completely enumerated until 1908. See Glossary for fiscal year definitions.

**TABLE 2. IMMIGRATION BY REGION AND SELECTED COUNTRY OF LAST RESIDENCE
FISCAL YEARS 1820 - 1998—Continued**

- ¹ Data for years prior to 1906 relate to country whence alien came; data from 1906-79 and 1984-98 are for country of last permanent residence; and data for 1980-83 refer to country of birth. Because of changes in boundaries, changes in lists of countries, and lack of data for specified countries for various periods, data for certain countries, especially for the total period 1820-1998, are not comparable throughout. Data for specified countries are included with countries to which they belonged prior to World War I.
- ² Data for Austria and Hungary not reported until 1861.

- ¹⁸ Land arrivals not completely enumerated until 1908.
- ¹⁹ No data available for Mexico from 1886-94.
- ²⁰ Data not reported separately until 1932.
- ²¹ Data for Jamaica not collected until 1953. In prior years, consolidated under British West Indies, which is included in "Other Caribbean."

- ²³ From 1899-1919, data for Poland included in Austria-Hungary, Germany, and the Soviet Union.
- ²⁴ From 1938-45, data for Austria included in Germany.
- ²⁵ Includes 32,897 persons returning in 1906 to their homes in the United States.

NOTE: From 1820-67, figures represent alien passengers arrived at seaports; from 1868-91 and 1895-97, immigrant aliens arrived; from 1892-94 and 1898-1998, immigrant aliens admitted for permanent residence. From 1892-1903, aliens entering by cabin class were not counted as immigrants. Land arrivals were not completely enumerated until 1908. II. REFUGEES

This section presents information on persons who are admitted to the United States because of persecution abroad, including the number and characteristics of persons applying, approved, arriving, and adjusting to lawful permanent resident status.

A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution. (See Appendix 3, p. A.3-9.) Claims of persecution must be based on race, religion, nationality, membership in a particular social group, or political opinion.¹ Persons within their country of nationality may be treated as refugees, provided that the President, after consultation with Congress, declares that they are of special humanitarian concern to the United States. The definition of refugee set forth in the Immigration and Nationality Act, as amended by the Refugee Act of 1980, (see Appendix 1, p. A.1-18) conforms to the 1967 United Nations Protocol on Refugees.

U.S. Refugee Program

The United States first recognized refugees for entry into the country in fiscal year 1946. After that time many different refugee programs were enacted on an ad hoc basis, including the Displaced Persons Act (see Appendix 1, p. A.1-10) and the Cuban and Indochinese Refugee Adjustment Acts. During the first decade of refugee programs, virtually all refugees entered the United States as immigrants. Since 1957, most refugees either have been paroled into the United States under special authority granted to the Attorney General by the Immigration and Nationality Act, or have entered in a statutory refugee status, to be adjusted to lawful permanent resident status at a later date.

Chart F depicts initial refugee admissions and adjustments to lawful permanent resident status for the period 1946-98. This graph demonstrates the time lag between initial admission and adjustment to immigrant status. At the

onset of parole programs there generally were no mechanisms for adjustment to permanent status, thus creating a recurring need for special legislation. The Refugee Act of 1980 addressed this situation by providing for routine adjustment of status by refugees one year after arrival.

Admission ceilings

At the beginning of each fiscal year, the President, after consultation with Congress to review the worldwide refugee situation, determines the number of refugees in need of resettlement who are of special humanitarian concern to the United States. The President then establishes the authorized number of admissions for that fiscal year. During the year, changes in the need for resettlement may require revisions in the overall limit on refugee admissions or reallocation among areas of the world. The admission ceiling of 83,000 for 1998 was established and later reallocated among geographic regions as follows:

Geographic region of origin	Initial ceiling	Final ceiling
Total	83,000	83,000
Africa	7,000	7,000
East Asia	14,000	14,000
Eastern Europe / Soviet Union (fmr.)	51,000	54,000
Latin America / Caribbean	4,000	4,000
Near East / South Asia	4,000	4,000
Unallocated, funded	3,000	-

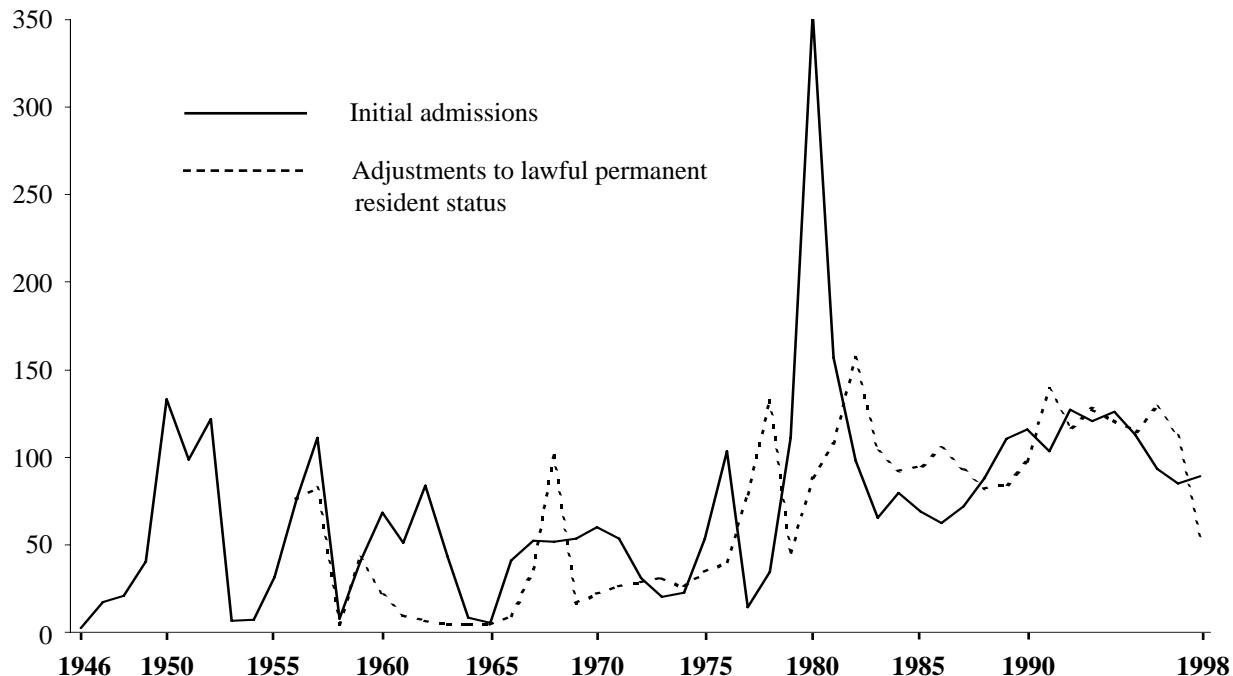

- Represents zero.

The authorized admission levels set the maximum number of refugees allowed to enter the United States in a fiscal year from each of the geographic areas of chargeability. The authorized ceiling was increased from 78,000 in 1997 to 83,000 in 1998, interrupting a downward trend since the peak of 142,000 in 1992. An unallocated funded reserve of 3,000 was placed in the 1998 ceiling to allow for small increases in one or more areas as needed without subtracting refugee authorized admissions from other areas.

¹ The Illegal Immigration Reform and Individual Responsibility Act of 1996, enacted September 30, 1996, Sec. 601, stipulates that a person qualifies as a refugee or asylee persecuted for political opinion if forced to undergo, has a well-founded fear of being compelled to undergo, or resists a coercive population-control procedure. Also, the Act set a combined annual ceiling of 1,000 persons who may be granted refugee or asylee status under this provision.

The ceiling for East Asia includes certain Vietnamese Amerasians, who enter the United States with immigrant visas. Although these aliens are immigrants rather than refugees, they are included in the refugee ceiling since they are eligible for refugee benefits in the United States. Only 373 Amerasians, including their family members, entered the United States in 1998. They are included in the immigrant rather than the refugee tables in the *Statistical Yearbook*. The Amerasian program is ending, since most of the eligible persons have already been identified and entered the United States.

Criteria for refugee status

During 1998, refugees were interviewed and approved for admission to the United States by officers in nine of the Service's forty overseas offices. To qualify for admission to the United States as a refugee, each applicant must meet

all of the following criteria: be a refugee as set forth in the Refugee Act of 1980; be among the types of refugees determined to be of special humanitarian concern to the United States; be admissible under the Immigration and Nationality Act; and not be firmly resettled in any foreign country. Spouses and minor children of qualifying refugees also enter the United States as refugees, either accompanying or following to join the principal refugee. Occasionally these family members gain refugee status after arriving in the United States; this was the case with 78 people in 1998.

Beginning in 1990, the administrative processing of refugee applicants residing in the Soviet Union was shifted to the United States. The resulting change in the

application procedure created discontinuity with prior INS data on refugee applications. Applicants from the former Soviet Union are now required to submit an initial questionnaire to the State Department's Washington Processing Center (WPC) in Rosslyn, Virginia. The WPC establishes interview priority for applications based on information supplied on the initial questionnaires and schedules interviews in Moscow. On the day of their interview, applicants submit completed refugee applications to Service officers in Moscow. Since 1990, those applications have been counted as filed on the interview date.

The number of initial questionnaires received at the WPC provides only a rough indication of the potential number of applications, because a questionnaire may include more than one person, and some potential applicants submit duplicate questionnaires. Some questionnaires never result in formal applications for refugee status, because they might exceed the yearly admissions allocated for the former Soviet Union. During fiscal year 1998, the WPC received 3,055 questionnaires and scheduled 44,893 persons for Moscow interviews. About 20 percent of these potential applicants did not appear for their interviews. Applicants from the former Soviet Union who were in other countries at the start of fiscal year 1990 are still allowed to submit applications for refugee status directly to

other INS refugee processing posts. Only 31 Soviet applications were filed outside of Moscow in 1998, including 6 spouses and children who received refugee status in the United States.

Data Overview

Applications (Tables D, 22, 23)

The number of applications for refugee status filed with the INS changed very little from 1997 (122,741) to 1998 (124,777) (Table 22). The leading countries of chargeability of the applicants were Bosnia-Herzegovina with 33 percent of the applications, the former Soviet Union (28), Vietnam (14), and Cuba (7) (Table D and Table 23). Among those countries of chargeability from which at least 1,000 applications were filed in 1998, the largest percentage increases over 1997 were in applications filed by nationals from Sierra Leone (from 17 to 1,041), Ethiopia (210 to 2,103), Sudan (602 to 3,538), Croatia (1,170 to 3,111), and Liberia (1,620 to 4,228); the largest percentage decreases were in applications filed by nationals of Somalia (from 6,510 to 2,638), Iraq (4,573 to 2,982), Iran (2,244 to 1,691), and Vietnam (19,552 to 17,240). Overall, among the five geographic regions of chargeability from which applications for refugee status were filed in 1998, applications filed by nationals from Africa and Eastern Europe increased about 26 and 6

percent, respectively, while those filed by nationals from the Near East, East Asia, and Latin America geographic regions decreased 30, 12, and 9 percent, respectively, over 1997.

Approvals (Tables D, 22, 23, 24)

The total number of refugees approved for admission to the United States was 6 percent lower in 1998 (73,198) than in 1997 (77,600) (Table 24). The leading countries of chargeability were Bosnia-Herzegovina with 25,393 approvals, the former Soviet Union (18,748), Vietnam (12,698), Liberia (3,009), Croatia (2,520), Somalia (2,396), and Iraq (2,184) (Table D and Table 23). These seven countries accounted for 91 percent of all approvals in 1998. The number approved from the former Soviet Union decreased 32 percent from 1997, reflecting a downward trend in applications in the past six years. The numbers of refugees approved from the East Asia and Africa geographic regions increased by 89 and 8 percent, respectively, in 1998. The significant increase in the East Asia geographic region was attributed to a large increase (95 percent) in the number of refugees approved from Vietnam. All Vietnamese refugee processing centers outside Vietnam were closed by the end of 1997. Residents of former refugee camps were asked to return to Vietnam. Their cases are processed through a special program called the Resettlement of Vietnamese Returnees (ROVR) in Vietnam. The ROVR program adjudicated 13,637 cases and approved 11,774 cases in 1998.

Dependents

Refugee figures include spouses and children who are cleared to join principal refugees already in the United States, and they count against the annual ceiling. Because of these family reunification cases, the data continue to show refugees being approved and arriving for some time after active refugee processing has ended for nationals of certain countries. Most of the refugee flow from Eastern Europe in fiscal year 1998, other than from the former Soviet Union and Yugoslavia, was family reunification cases. Overall, 2.3 percent of the applications and 2.8 percent of the approvals were family reunification cases. In comparison with the number of applications filed and refugees approved within each geographic region, the Africa region had the highest percentage of family reunification cases in both categories, 7.0 and 11.1 percent, respectively.

Arrivals (Tables 24, 25)

Refugee arrivals into the United States increased to 76,181 in 1998 from 69,276 in 1997 (Tables 24 and 25).² The

More than 76,000 refugees arrived in the United States during 1998.

increase was largely attributed to the increase in refugee arrivals from Liberia, Sudan, Vietnam, and Bosnia-Herzegovina. The former Yugoslavia (30,906), former Soviet Union (23,349), Vietnam (10,288), and Somalia (2,951) were the leading countries for refugee arrivals in 1998, comprising 89 percent of the total. The time lag between approval of a refugee application and the refugee's arrival in the United States may be several months or more. After approval, refugees must undergo health and security clearances, have sponsorship and placement arranged, and in some cases go through orientation and English language training. This time lag accounts for the discrepancies between approval and arrival figures in any given year.

Understanding the Data

Data Collection

The Immigration and Naturalization Service collects data on refugees at three points during processing: when they apply for refugee status abroad; when they are admitted to the United States; and when they adjust to lawful permanent resident status. The INS overseas offices collect data on applicants for refugee status. Each office completes INS Form G-319, Report of Applicants for Refugee Status under Section 207, which reports refugee casework by the country to which each applicant is chargeable.

Since 1987, the INS's Nonimmigrant Information System has collected data on refugee arrivals. The system compiles refugee arrival data by country of citizenship on a monthly basis from INS Form I-94, Arrival/Departure Record (see Nonimmigrants section). Since it records each entry of a person with nonimmigrant status, a refugee traveling abroad and returning to the United States may be counted more than once during a fiscal year.

Both the Bureau for Refugee Programs (Department of State) and the Office of Refugee Resettlement (Department of Health and Human Services) collect data on refugees admitted to the United States. The Bureau for Refugee Programs collects data through the Intergovernmental Organization for Migration, which is the agency responsible for arranging the transportation of refugees to the United States. The Office of Refugee Resettlement, responsible for the disbursement of funds for refugee benefits, collects detailed data on the characteristics of refugees at the time they are initially admitted to the United States.

² Refugee arrival data are from the Bureau for Refugee Programs, Department of State. See Data Collection section.

The Immigration and Naturalization Service collects data on refugees adjusting to lawful permanent resident status as part of its immigrant data series gathered by the Computer Linked Application Information Management Systems (CLAIMS). The data collected include demographic variables as well as immigration-oriented variables (see Immigrants section). This is the only stage in the refugee process where the INS collects detailed information about the characteristics of refugees.

Limitations of Data

Prior to the 1996 edition, refugee arrival data presented in the *Statistical Yearbook* were derived from the INS's

Nonimmigrant Information System (NIIS). However, since this system records each entry of a person with nonimmigrant status, a refugee traveling abroad and returning to the United States may be counted more than once during a fiscal year. After careful consideration of the reporting requirements and limitations of data collected in the NIIS, it was decided that the *Yearbook* would present refugee arrival statistics from the Bureau for Refugee Programs, Department of State. This source counts the actual number of refugees arriving in the United States in each fiscal year. Therefore, any comparison of refugee arrival data from the 1995 or earlier editions of the *Yearbook* to 1996 or later editions must be made with caution.

Refugee detailed tables are located at the end of the Asylees text section

III. ASYLEES

This section presents information on persons who come to the United States to seek asylum from persecution abroad, including the number and characteristics of persons who filed, were granted asylum, and adjusted to lawful permanent resident status.

An asylee is an alien in the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution. (See Appendix 3, p. A.3-2.) An asylee must meet the same criteria as a refugee; the only difference is the location of the person upon application—the potential asylee is in the United States or applying for admission at a port of entry, and the potential refugee is outside the United States. The Immigration and Nationality Act, as amended by the Refugee Act of 1980, regulates U.S. asylum policy as well as governing refugee procedures. The Act, for the first time, established a statutory basis for granting asylum in the United States consistent with the 1967 United Nations Protocol on Refugees.

U.S. Asylum Program

Filing of claims

Any alien physically present in the United States or at a port of entry may request asylum in the United States. According to the Refugee Act, current immigration status, whether legal or illegal, is not relevant to an applicant's asylum claim. Aliens may apply for asylum in one of two ways: with an INS asylum officer; or, if apprehended, with an immigration judge as part of a deportation or exclusion hearing. Traditionally, aliens who appear at ports of entry without proper documents and request asylum were referred for exclusion hearings; however, the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA) (see Appendix 1, p. A.1-23) made major revisions to the procedure, that became effective on April 1, 1997. Under the new law, such aliens are referred to asylum officers for credible fear interviews. These interviews are not formal asylum hearings. The purpose of the interviews is to determine whether aliens might have credible fear of persecution and thus be eligible to apply for asylum before an immigration judge. In credible fear interviews, aliens only need to show that there is a significant possibility that they might qualify for asylum. To be granted asylum, aliens must show convincing evidence of a well-founded fear of persecution. Those who fail to demonstrate that they have a significant possibility for establishing eligibility for asylum are placed in

expedited removal proceedings. However, upon the alien's request, an immigration judge may review the outcome of the interview. The data reported in this section pertain only to asylum cases filed with INS asylum officers. Aliens denied asylum by the INS may renew asylum claims with an immigration judge.

Adjudication of claims

On April 2, 1991, the Asylum Officer Corps (AOC) assumed responsibility within INS for the adjudication of asylum claims that were filed with the INS. Before that date, such claims had been heard by examiners in INS district offices. During fiscal year 1998, asylum officers worked from eight sites in the United States—Arlington, VA, Chicago, Houston, Los Angeles, Miami, New York City, Newark, NJ, and San Francisco. Applicants who did not live near these locations were interviewed by asylum officers who traveled to other INS offices.

In March 1994, the INS published proposed regulations designed to streamline the asylum decision process, discourage the filing of frivolous claims, and integrate the work of asylum officers with the work of the immigration judges in the Executive Office of Immigration Review (EOIR, an independent Justice Department agency) in the case of claims that do not appear to meet the standards for granting asylum. The final asylum reform regulations were published in December 1994, and took effect on January 4, 1995.

Under asylum reform the INS standard is to conduct the asylum interview within 60 days after the claim is filed, and to identify and grant in a timely fashion those cases that have merit. If the INS asylum officer does not find the claim to be grantable at the interview, the applicant is referred immediately for deportation proceedings before EOIR (unless a nonimmigrant status is still valid). The immigration judge may grant the claim or may issue a denial and an order of deportation. Under this system INS asylum officers issue relatively few denials, but an interview followed by a referral to EOIR represents the asylum officer's judgment that the application is not readily grantable. An applicant who fails without good cause to keep a scheduled appointment for an asylum

interview is referred immediately to EOIR for deportation; this is considered to be one type of case closure.

Starting in 1997, the AOC also began conducting credible fear interviews as required by IIRIRA, and interviewing applicants for refugee status at the INS overseas locations. During fiscal year 1998, asylum officers interviewed refugee applicants at six overseas locations—Croatia, Cuba, Germany, Kenya, Russia, and Vietnam.

More than 55,000 asylum applications were filed in the United States during 1998.

Data Overview

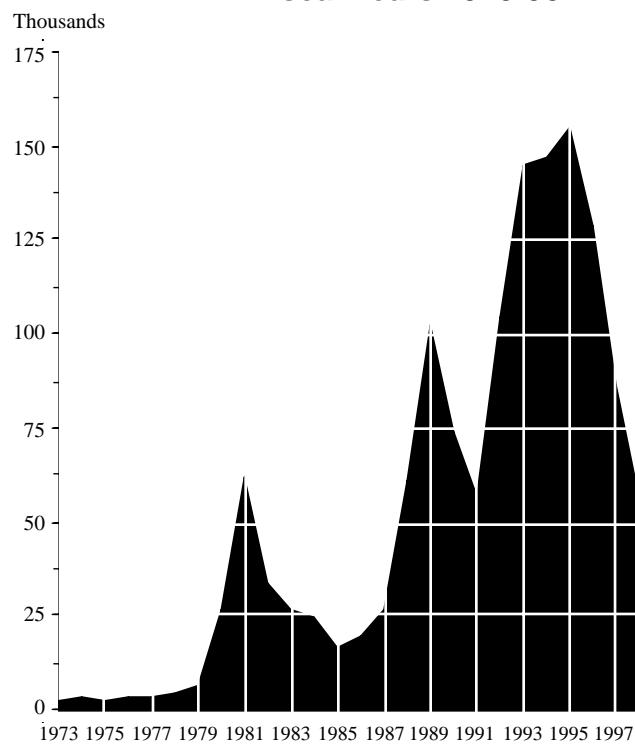

Applications filed (Chart G, Tables 27, 29, 30)

The annual number of asylum applications filed with the INS has fluctuated greatly since the effective date of the Refugee Act of 1980 (see Appendix 1, p. A.1-18), as shown in Chart G. In fiscal year 1998, 55,428 asylum cases were filed or reopened. This represents a 35 percent decrease from the 85,866 cases filed in 1997 (Table 27). The sharp decline in 1998 was due largely to significant decreases in claims filed or reopened by nationals of Mexico, Guatemala, India, Iraq, Haiti, and El Salvador.

In 1998, 35,903 new claims were filed with the INS. Nearly 4,500 new claims were filed by Mexicans, with more than 3,800 by Salvadorans. The People's Republic of China, with 3,075 new claims, ranked third, followed by Haiti (2,720), Guatemala (2,666), and Somalia (2,305) (Table 28). About two thirds of the new claims received (23,624) were filed by male applicants. Excluding the 3,923 claims filed or reopened under the terms of the ABC settlement, more than 51,500 applications were received during 1998, a decrease of nearly 38 percent from fiscal year 1997.

More than 19,500 asylum cases were reopened in 1998, which accounted for 35 percent of the applications received (Table 29). The leading countries of nationality of the reopened cases were Guatemala (3,230), the People's Republic of China (2,675), El Salvador (2,498), and Mexico (2,203). The number of reopened cases has increased significantly since May 1995. This is due to an automatic function which triggers the reopening of cases that were administratively closed when aliens apply for renewal of their employment authorization. Those cases were administratively closed due to a failure to appear for the asylum interview or for an invalid mailing address. This function also automatically reschedules an interview.

Under the new regulation, those who do not appear for the scheduled interview can be placed in removal proceedings immediately. Some of these reopened cases may qualify for ABC treatment.

Trends in asylum applications filed by nationals from Central America (Tables E, 29)

For over a decade, nationals from Central America dominated the annual number of asylum applications filed in the United States. From 1986 to 1992, about half of all asylum applications were filed by Central Americans. In 1993 and 1994, that percentage had fallen somewhat, but it remained at about 40 percent of the total applications filed. Then, the number of applicants from Central America surged to a new height in the next two years, well over half of all asylum applicants. A sharp decline in cases filed by Nicaraguans was offset by a sharp increase from Guatemalans, and Salvadorans, later. Beginning in 1997, the numbers started a sharp decline due largely to a significant decrease in claims filed or reopened under the terms of the American Baptist Churches (ABC) v. Thornburgh settlement (see discussion below) because of the termination of the ABC filing period. As a result, Central Americans accounted for about 20 percent of the new claims and 25 percent of the total in 1998. The trend in claims from Central America is shown in Table E.

In the past few years, the trend in asylum claims filed or reopened by nationals from Central America has been driven in large part by ABC cases. Under the terms of this 1991 class action lawsuit settlement, many nationals of El Salvador and Guatemala were allowed to file or renew their claims for asylum. Nationals of Guatemala had a filing deadline of March 31, 1992, which was the peak year for claims from this country. The 187,000 Salvadorans who had registered for Temporary Protected Status (TPS) in 1991 became eligible to file for asylum at the expiration of their TPS period in 1992. They were later granted additional time under deferred enforced departure periods which extended until December 1994, and they ultimately had until January 31, 1996 to apply for asylum under the ABC agreement. The number of ABC claims filed by Salvadorans surged during fiscal year 1996 before the filing deadline. These claims are heard under the pre-reform regulations. Applications filed after the ABC filing deadline were processed as reform filings, except those ABC cases that were closed by the EOIR or federal courts and were not previously filed with the INS. Under the settlement, once the latter cases are identified by the INS, they are treated as ABC filings instead of reform filings. During 1998, 3,923 cases were identified as either filed or reopened as ABC cases.

On November 19, 1997, the Nicaraguan Adjustment and Central American Relief Act (NACARA) was signed into law. Section 203 of the NACARA permits certain Guatemalans, Salvadorans and nationals of former Soviet bloc countries to apply for suspension of deportation or special rule cancellation of removal under the more generous standards in effect before the 1996 immigration law. Individuals granted relief under NACARA are permitted to remain in the United States as lawful permanent resident aliens. All ABC class members, who are eligible for ABC benefits and have asylum applications

pending with the INS, are also eligible to apply for the NACARA benefits with the INS Asylum Program.

Cases completed (Tables 27, 28, 29, 30)

During fiscal year 1998, the Asylum Officer Corps completed work on 85,737 claims and adjudicated about 50 percent (42,738) of them (Table 27). The number of cases granted in 1998 was 9,949, representing 23.3 percent of the cases adjudicated compared to the 19.1 percent approval rate in fiscal year 1997. These cases encompassed 12,951 persons given asylum (Tables 28 and 29). The leading countries of nationality were Somalia with 1,208 granted cases, the former Soviet Union (864), the People's Republic of China (508), Iran (496), Ethiopia (489), and Liberia (405) (Table 29).

Coercive population-control procedures

Section 601 of the IIRIRA stipulates that a person qualifies as a refugee or asylee persecuted for political opinion if forced to undergo, has a well founded fear of being compelled to undergo, or resists a coercive population-control procedure. It sets a combined annual ceiling of 1,000 persons who may be granted refugee or asylee status under this provision. Both the INS and the Executive Office for Immigration Review (EOIR) grant conditional asylee status to qualified applicants each year under this provision—status that is not subject to the 1,000 annual ceiling. At the beginning of a new fiscal year, the INS Asylum Office issues 1,000 final grants—counted toward the annual ceiling of the previous year—to those who have received a conditional asylee status from either agency in previous fiscal years. The selection criterion for final grants is the date of the conditional grants. Those who received their conditional grants earlier would receive their final grants first. At the beginning of fiscal year 1999, the INS issued the 1,000 fiscal year 1998 final grants for asylum status to 185 individuals who received their

conditional grants from INS, 114 whose conditional grants were made by the Board of Immigration Appeals (BIA), and 701 whose conditional grants were made by immigration judges in the previous fiscal year. China was the country of origin of all grants. No one was granted refugee status in fiscal year 1998 based on coercive population-control measures.

Cases pending (Tables 29, 30)

The number of asylum cases pending for adjudication decreased about 10 percent, from 399,826 in 1997 to 360,247 in 1998. Cases filed by nationals of El Salvador (180,991), Guatemala (105,207), Nicaragua (15,134), and Haiti (14,876) accounted for more than 87 percent of the pending cases. The ABC cases, which also can be handled under the NACARA provisions, comprised more than 90 percent of Salvadoran and Guatemalan, and 70 percent of all pending cases. A large number of Nicaraguan and Haitian pending cases also will be eligible for the NACARA benefits.

Credible fear interviews

During fiscal year 1998, about 3,400 aliens appeared at ports of entry without proper documents and requested asylum. They were subsequently referred to asylum officers for credible fear interviews. Nationals of Sri Lanka submitted the most applications (608), followed by the People's Republic of China (582) and Haiti (384). These three countries accounted for almost 46 percent of all application in 1998. It should be noted that some applicants might change their opinions and decide to withdraw their asylum applications before a credible fear interview takes place. The Asylum Officer Corps conducted 2,726 credible fear interviews in 1998. The total approval rate for the interviewed cases was about 95.9 percent.

Understanding the Data

Tables 29 and 30 contain a column showing the number of applications that were reopened during the year. Most of these are cases that had been closed earlier without a decision. The number of asylum applications filed is defined here as the sum of new applications received and applications reopened during the year. The tabulations also contain columns showing the number of cases referred to immigration judges, with and without an interview. A referral due to failure to keep an appointment for an interview without good cause is considered comparable, for statistical purposes, to a closed case. The approval rate is calculated as the number of cases approved divided by the number of cases adjudicated, which is defined as the cases approved, denied, and referred to EOIR following an interview.

Data Collection

Prior to April 1, 1991, data on asylum applicants reflect cases filed with INS district directors and, subsequently, cases filed with INS asylum officers on Form I-589 (Request for Asylum in the United States). A centralized, automated data system (Refugee, Asylum, and Parole System—RAPS) has been developed to support the processing of the existing caseload and new asylum applications. The system is designed to support case tracking, schedule and control interviews, and generate management and statistical reports. The system is capable of reporting asylum casework by nationality and other characteristics of asylum applicants. Data can be reported by case or by the number of persons covered, since a case may include more than one person. Data on asylum applicants have been collected by the INS for selected nationalities since July 1980, and for all nationalities since June 1983.

As with refugees, the Immigration and Naturalization Service collects data on asylees adjusting to lawful permanent resident status in the Computer Linked Application Information Management Systems (CLAIMS) (see Immigrants section). Adjustment to immigrant status has been the only point at which detailed characteristics of asylees were collected in past years. The RAPS system is now able to provide data on selected characteristics of asylees at an earlier time.

Limitations of Data

The figures shown here for fiscal year 1998 differ slightly from preliminary statistics released by the Asylum Division in November 1998. The data presented here were tabulated from the RAPS system three months after the close of the fiscal year and incorporate late additions and corrections to the database. Cases entered into the RAPS system during fiscal year 1998 with filing dates in previous fiscal years were treated as new cases in these tabulations. Other corrections resulted in a decrease from 399,826 to 397,809 in the pending caseload as reported in the 1997 *Statistical Yearbook* and at the beginning of fiscal year 1998 in this edition. Another change between 1997 and 1998 concerns the identification of applicants from the former Soviet Union whose records are now being assigned to one of the succeeding republics. Therefore, the pending number of cases from "Unknown republic" decreased, and the numbers for Armenia, Russia, Ukraine, and other republics increased.

It is possible for an asylum case to have more than one action during a year, particularly if the claimant fails to pursue a claim and later reopens it. Therefore, some claims may be double-counted as received and reopened,

or closed and denied or granted. For this reason, and due to recent growth in the number of reopened claims, the pending caseload at the end of the year can no longer be calculated by taking the pending caseload at the beginning of the year, adding claims filed, and subtracting claims completed.

Data on applicants for asylum collected by the Immigration and Naturalization Service historically have covered only cases filed with the INS. Information has not been available on cases filed by apprehended aliens or cases denied or referred by the INS and renewed with immigration judges in the Executive Office for Immigration Review. The two agencies are working to integrate their data systems to provide these data in the future. Principal

applicants whose asylum applications are successful can apply for their spouses and minor children, whether they are in the United States or abroad, and these relatives also receive status as asylees. The RAPS system collects information on the spouses and children of asylum applicants only if they are included on the principal's application. Information regarding relatives whose principals petition for them after receiving asylum is collected by the CLAIMS and is not included in any calculation in this publication. The data collected by the INS at the time asylees adjust to permanent resident status include all aliens who adjust regardless of whether they were granted asylum by the INS, immigration judges, or the BIA. Adjustment data also include spouses and children of persons granted asylum.

NOTE: The Refugee Act of 1980 went into effect April 1, 1980. Because of an administrative processing change, 45,825 applications pending in Moscow at the end of fiscal year 1989 were administratively closed and added to the pool of initial questionnaires submitted to the Washington Processing Center (WPC) beginning in 1990. Changes in the number of applications pending from 1991 to 1992 and 1993 to 1994 are due to revisions in the data from reporting offices.

¹ In editions of the *Statistical Yearbook* prior to 1996, refugee arrival data were derived from the Nonimmigrant Information System of the Immigration and Naturalization Service. However, beginning with the 1996 edition, arrival data are from the Bureau for Refugee Programs, Department of State. Any comparison of refugee arrival data between this and any pre-1996 editions of the *Yearbook* must be made with caution (see Refugees section, Data Overview and Data Collection). Arrivals may be higher than approvals because of the arrival of persons approved in previous years.

NOTE: The authorized admission levels for 1990, 1991, 1992, 1993, 1994, and 1995 were 125,000, 131,000, 142,000, 132,000, 121,000, and 112,000, respectively, including 15,000 Amerasians in both 1990 and 1991, 18,500 in 1992, 16,000 in 1993, 3,500 in 1994, and 1,000 in 1995. Since Amerasians enter the United States on immigrant visas, they are not included as refugee admissions. As a result, the authorized admission levels for 1990 through 1995 for East Asia have been reduced accordingly. Beginning in fiscal year 1996, there is no specific allocation for Amerasians in authorized admissions.

¹ Beginning in 1992, includes cases newly filed and cases reopened. ² Includes approvals, denials, and cases otherwise closed. Beginning in 1995, also includes cases referred to an immigration judge (interviewed and not interviewed). Cases otherwise closed are those in which the applicant withdrew the case from consideration, never acknowledged the request for an interview with the INS, or died. ³ Includes approvals and denials. Beginning in 1995, includes cases referred to an immigration judge following an interview. ⁴ Cases approved divided by cases adjudicated. ⁵ The three-month period—July 1 through September 30, 1976—between fiscal year 1976 and fiscal year 1977. At that time, the fiscal year definition was changed from July 1-June 30 to October 1-September 30.

NOTE: The Refugee Act of 1980 went into effect April 1, 1980. Data for fiscal years 1982 and 1983 have been estimated due to changes in the reporting procedures during those two periods. Since April 1, 1991, authority to decide most asylum claims has resided with the INS Asylum Officer Corps. See Glossary for fiscal year definitions.

IV. TEMPORARY ADMISSIONS

This section presents information on the number and characteristics of persons who come to the United States on a temporary basis (nonimmigrants), including parolees—persons allowed temporary entrance under special circumstances.

Nonimmigrants

A nonimmigrant is an alien admitted to the United States for a specified purpose and temporary period but not for permanent residence.

(See Appendix 3, p. A.3-8.)

Although the typical nonimmigrant is a tourist who visits for a few days to several months, there are numerous classes of nonimmigrant admission, ranging from students to ambassadors. More than 30.1 million nonimmigrant admissions were counted during fiscal year 1998—the largest number of nonimmigrant admissions to the United

States in any year. This represents an increase of more than 5.3 million since 1996—an annual average increase of 10.2 percent between 1996 and 1998.¹

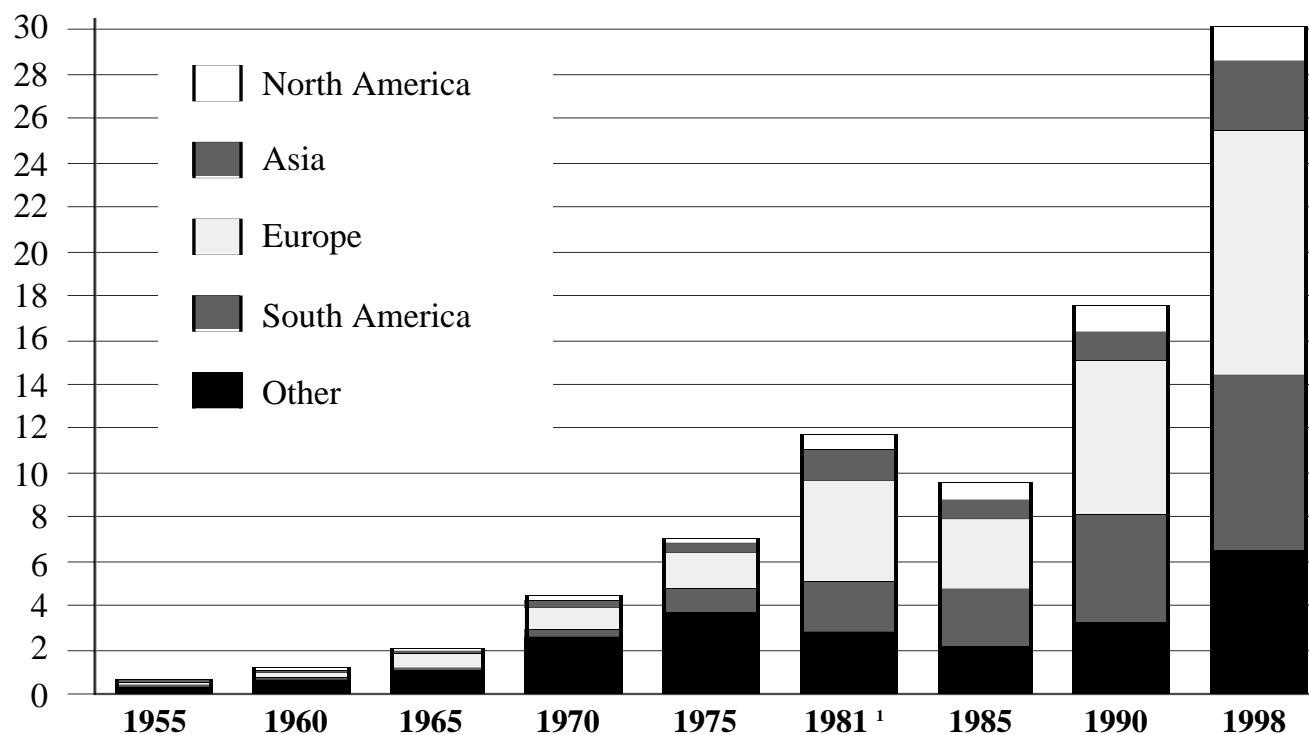

U.S. Nonimmigrant Program

Nonimmigrants were first defined in the Immigration Act of 1819, but the Act of 1855 was the first to require the reporting of “temporary arrivals” separately. The Act of 1924 defined several classes of admission that have been expanded in subsequent legislation. Though “tourists”

(temporary visitors for pleasure) have consistently been by far the most numerous nonimmigrant class of admission to the United States, a wide variety of temporary visitors now fall within the nonimmigrant classification. Second in volume to tourists are business people coming to the United States to engage in commercial transactions (though not for employment in this country).

Nonimmigrant categories (*Tables 37, 38, 39, 40, 43*) Other categories of admission make up a much smaller share of the nonimmigrant total, such as foreign students and temporary workers. Temporary workers are admitted to the United States with “specialty occupations” (such as computer systems analysts and programmers) or to perform temporary services or labor when persons

capable of performing such services or labor cannot be found in this country (such as agricultural laborers). Others who are granted authorization to work temporarily in the United States include: exchange visitors who enter to study, teach, or conduct research; intracompany transferees, to render managerial or executive services in the United States to international firms or corporations; and industrial trainees. Though not strictly considered as employed in the United States, treaty traders and treaty investors enter temporarily to conduct trade or to invest substantially in enterprises under the provisions of treaties of commerce and navigation between the United States and foreign states.

Nonimmigrants also include several types of temporary visitors who are connected in some way with a foreign government or who represent an international organization. Ambassadors, public ministers, diplomats, and consular officers serve temporarily in this country, bringing with them members of their immediate families as well as personal employees, attendants, and servants. Officers and employees of international organizations such as the United Nations add to the list of nonimmigrant visitors entering the United States each year. The Glossary contains a detailed definition of nonimmigrants, a listing of each of the nonimmigrant classes of admission, and a detailed definition of each class.

Admission policy

The U.S. government has an “open door” policy for most nonimmigrant classes of admission. There are no restrictions on the total number of admissions each year; indeed, tourists (the majority of nonimmigrants) are encouraged to visit as a boon to the U.S. economy. Regulations govern such areas as the grounds for nonimmigrant admission, length and extension of stay, employment in the United States, accompaniment by family members, travel restrictions within the United States, and change of admission status. For example, ambassadors are allowed to remain in the United States for the duration of their service, students to complete their studies, visitors for business for a maximum of 6 months (plus 6-month extensions), and aliens in transit through the United States for not more than 29 days (with no extensions).

Employment (Tables 38, 39, 40, 43)

family members

Most types of nonimmigrants are not allowed employment while in the United States, though exceptions may be granted, for example to students and to family members of international representatives. On the other hand, temporary workers come to the United States expressly for purposes of employment. Most nonimmigrant aliens may bring immediate family members with them; the exception is transit aliens other than foreign government officials.

Transit aliens, crewmen, certain exchange visitors, Visa Waiver Pilot Program visitors, fiance(e)s coming to the United States to marry U.S. citizens, and visitors under a special program to provide certain critical information to Federal or State courts are the nonimmigrants who are prohibited from changing to another nonimmigrant category while in this country.

Visa Waiver Pilot Program (Table 39)

The Immigration Reform and Control Act (IRCA) of 1986 (see Appendix 1, p. A.1-19) authorized the establishment of a pilot program that permitted certain nonimmigrants from qualified countries to enter the United States on a temporary basis without nonimmigrant visas. The Visa Waiver Pilot Program (see Appendix 3, p. A.3-14) was originally extended only to approved countries that offered a reciprocal waiver of visas to U.S. citizens. The program is limited to admissions in the visitor for pleasure and for business classes of admission, with admission not to exceed 90 days. The Immigration Act of 1990 (see Appendix 1, p. A.1-20-21) revised the Visa Waiver Pilot Program and extended it through fiscal year 1994; subsequent legislation has further extended the program into fiscal year 2000. To date, 26 countries are members of the Visa Waiver Pilot Program. Entries for fiscal year 1996 and 1998 are shown in Table D for current participant countries.

Guam Visa Waiver Pilot Program

Under the Visa Waiver Pilot Program, certain visitors from designated countries may visit Guam for up to 15 days without first having to obtain nonimmigrant visitor visas. The table above shows the countries participating in this program and entries for fiscal year 1998.

North American Free-Trade Agreement

(Tables 38, 39, 40, 43)

In December 1992, the Presidents of the United States and Mexico and the Prime Minister of Canada signed an agreement, enacted in December 1993, known as the North American Free-Trade Agreement (NAFTA). (See Appendix 1, p. A.1-22.) This law superseded the United States-Canada Free-Trade Agreement, establishing a special, reciprocal trading relationship among the United States, Canada, and Mexico. This agreement extended to the citizens of Mexico (with certain stipulations) and Canada the nonimmigrant class of admission exclusively for business people entering the United States to engage in activities at a "professional" level. Additionally, the agreement facilitates entry for Mexican as well as Canadian citizens seeking temporary entry as visitors for business, treaty traders and investors, and intracompany transferees. Entries under NAFTA began in February 1994. Data for fiscal year 1998 are shown for both NAFTA and the United States-Canada Free-Trade Agreement in Table 39.

**A record 30.1 million
nonimmigrants were admitted
to the United States during 1998.**

Data Overview

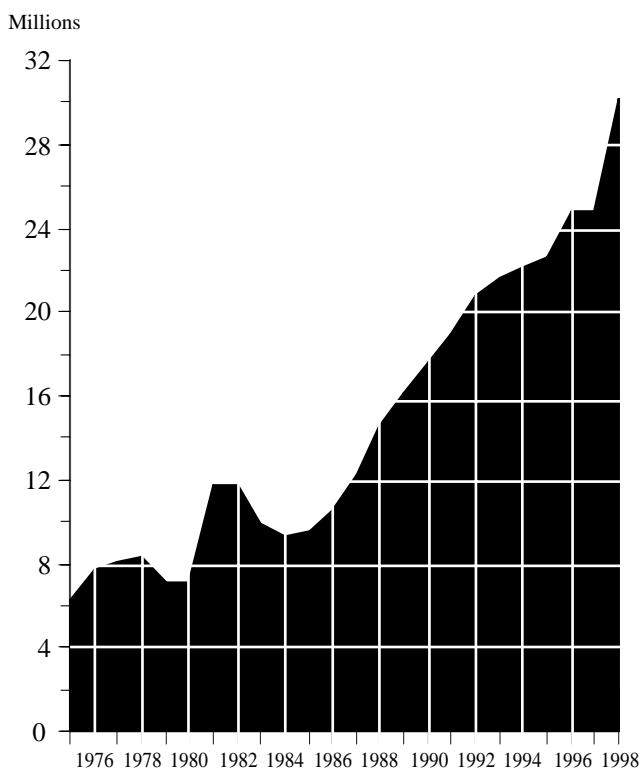

Recent trends in admission (Tables 37, 39)

As noted, the 1998 total of more than 30.1 million nonimmigrant arrivals represents an increase of more than 5.3 million (10.2 percent annual average) from fiscal year 1996. Total nonimmigrant admissions numbered about 6.3 million during 1975 and steadily increased to about 11.8 million in both 1981 and 1982. The number stabilized at about 9.5 million from 1983 to 1985 (recording a low in 1984) then began a steady increase that continued from 1985 to 1998 (Chart F).

Class of admission (Tables 37, 38, 39, 40, 43)

Of the more than 30.1 million nonimmigrants who arrived in fiscal year 1998, a large majority (77.1 percent) entered as visitors for pleasure (tourists), with the next highest class of admission, temporary visitors for business, accounting for 14.6 percent. Nearly 251,000 persons entered as

exchange visitors to study, teach, or conduct research in the United States, bringing with them some 42,000 spouses and children (Chart G). Nearly 565,000 foreign students entered the United States to pursue a full course of study (predominantly in academic institutions) accompanied by almost 34,000 spouses and children (Chart H).

More than 225,000 representatives of foreign governments (less than 1 percent of total entries) entered the United States as nonimmigrants in 1998. This figure consists of: nearly 127,000 foreign government officials (including ambassadors, public ministers, career diplomats, and consular officers), family members, and attendants; more than 86,000 foreign representatives to international organizations (including families and attendants); and more than 12,000 officials serving the North Atlantic Treaty Organization (NATO) (including family members).

Country of citizenship (Tables 38, 40, 41, 42, 44)

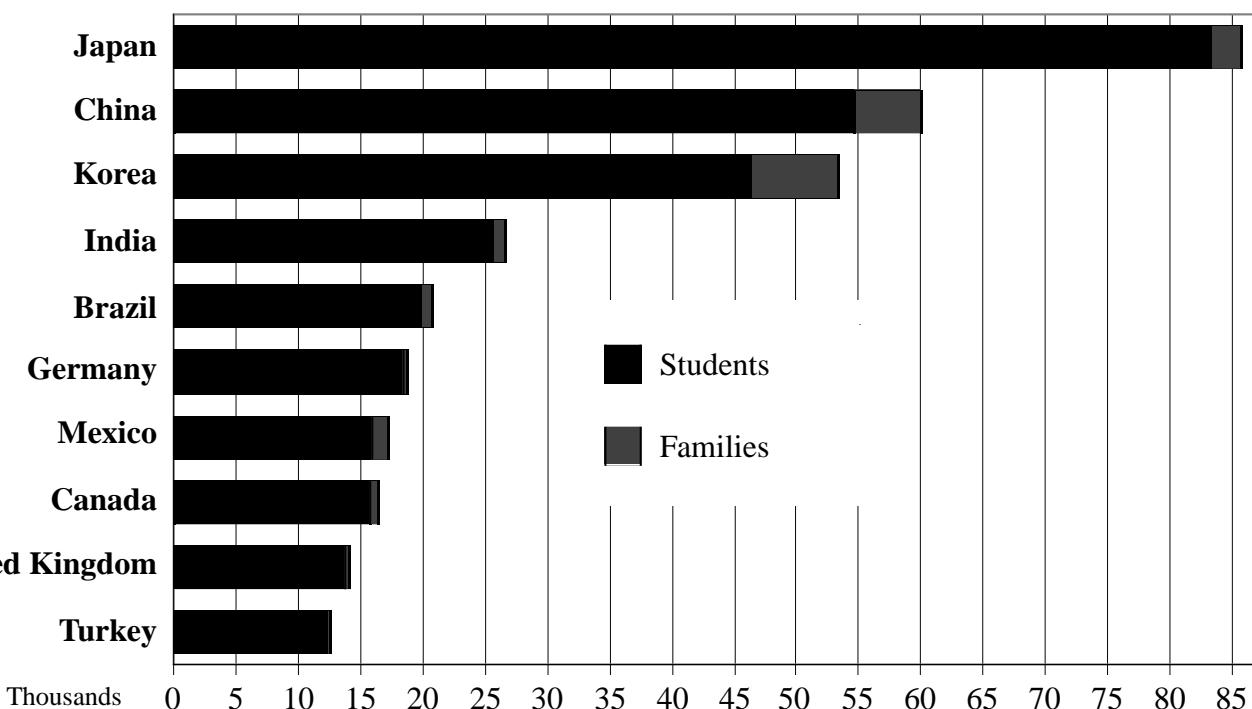

Half of all nonimmigrants arriving in 1998 were citizens of one of four countries: Japan (17.5 percent), the United Kingdom (14.0), Mexico (11.6), and Germany (7.0). Tourists far outnumbered other classes of entry for almost every country of citizenship (Chart I). Eighty-nine percent of Japanese nonimmigrants were tourists (visitors for pleasure),

compared to 76 percent of citizens of France, and 54 percent of Chinese (People's Republic of China and Taiwan).

Port of entry (Table 41)

Just as four countries dominated nonimmigrant admissions to the United States in 1998, so did four ports of entry. Miami (14.4 percent), New York (13.5), Los Angeles (11.0), and Honolulu (7.4) together accounted for more than 46 percent of all entrants. The share of all four ports decreased in 1998, indicating a general dispersement of arrival to other ports within the United States since 1996.

State of intended residence (Tables 43, 44)

Similar to ports of entry, four states were most often the intended destination of temporary visitors to the United States: Florida (18.1 percent of total admissions, nearly one quarter of that from the United Kingdom), California (13.9 percent of the total, 17.4 percent from Japan), New York (12.5 percent of the total, 15.6 percent from the United Kingdom), and Hawaii (7.0 percent of the total, 85.5 percent from Japan).

Parolees

A parolee is an alien, appearing to be inadmissible to the inspecting officer, allowed to enter the United States under urgent humanitarian reasons or when that alien's entry is determined to be for significant public benefit.
 (See Appendix 3, p. A.3-9.)

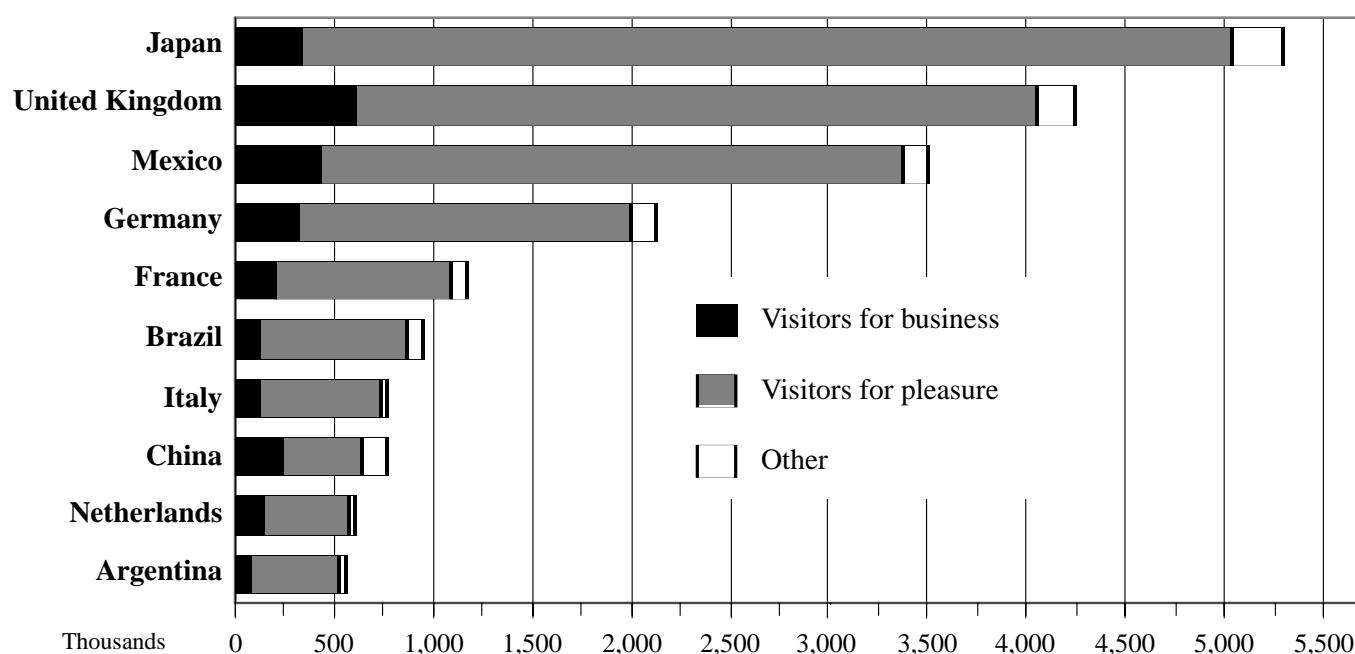

Authority to grant parole

The Attorney General has the authority to allow the temporary admission of an alien on a case-by-case basis who may appear inadmissible but who enters the United States for urgent humanitarian reasons or when that alien's entry is determined to be for significant public benefit. Parole does not constitute formal admission to the United States. It confers only temporary status, and parolees are required to leave when the conditions supporting their admission are ended.

U.S. Parole Program

Parolees are treated as nonimmigrants, but their numbers are not reported in the nonimmigrant admission data

(Tables 37-44). They are usually classified into three main categories: deferred inspections; port-of-entry/district advance parolees; and humanitarian/public interest/overseas parolees. In recent years, more than 100,000 parole admissions have been authorized annually, and in fiscal year 1998 the number exceeded 200,000.

Categories of parole

Deferred inspection is used when an alien does not appear to be clearly admissible based on the evidence at hand. The parole is issued and an appointment is made for the alien to appear at another INS office, where more information is available and the inspection can be completed. These cases are usually resolved within 2 weeks, and the alien is admitted in the appropriate category. Deferred inspection has also been used to admit people in special situations. For example, in fiscal years 1993 and 1994 combined, more than 12,000 nationals of El Salvador were admitted under deferred inspection. Many of them were members of the ABC class (see Asylum section) admitted to file or renew claims for asylum. By 1998 only 199 Salvadorans were given deferred inspection. Parole may also be granted by advance arrangement with an INS District Office or, more commonly, at a port of

entry. These admissions comprised more than 75 percent of all paroles in fiscal year 1998. These cases are most common at the land border ports and often involve the reentry of permanent resident aliens who are not carrying their documents. Again, these cases are typically resolved rapidly when the documents are produced.

More than 234,000 parolees were admitted to the United States during 1998.

The more exceptional instances of parole arise in emergencies or special situations. People may be admitted to receive medical treatment or because they are injured or acutely ill. They may be brought to the United States to take part in legal proceedings as witnesses or defendants, or as part of a special overseas program undertaken in an agreement with another government. The latter category is the only one that may constitute a long-term admission to the United States.

Country of citizenship

Table E displays the total number of parolees admitted from fiscal year 1993 through fiscal year 1998 by the three major categories of parole. Within each category, the five countries accounting for the largest number of parole admissions in fiscal year 1998 are shown. Our neighboring countries, Canada and Mexico, account for the largest number of parolees in the deferred inspections and port-of-entry/district advance categories. Parolees from the United Kingdom are the third most common in those categories. More than half of the increase in this category between 1996 and 1998 was due to the increase for Canada and Mexico alone.

Table F presents more detail for the same years regarding admissions under the overseas, humanitarian, and public interest parole categories. The annual numbers admitted have fluctuated according to the operations of the special overseas programs that account for many of the admissions in this category. Beginning in 1994 and continuing through 1998, the largest number of overseas parolees

were Cubans admitted under the 1994 migration agreement with Cuba. Most of the parolees from Vietnam, Cambodia, and the former Soviet Union arrived under special legislation after being denied refugee status.² These persons are allowed to adjust to immigrant status after one year of residence in the United States. As the declining numbers from these countries show, these admissions are waning.

A large proportion of the humanitarian parolees admitted annually for medical and related reasons are from Canada and Mexico, and the increase in this category between 1996 and 1998 was due entirely to the increase in parolees from Mexico. The rest come in small numbers from many other countries. Similarly, most of the annual admissions under public interest parole for legal and related reasons are from Canada and Mexico, and the increase again can be attributed to parole admissions from Mexico.

² The Foreign Operations Act of November 21, 1989 (see Appendix 1, p. A.1-20). This provision is commonly known as the Lautenberg Amendment.

Understanding the Data

Data Collection

The Nonimmigrant Information System (NIIS) is designed to provide for each nonimmigrant a record of legal admission and departure. The system also produces statistics for such variables as age, country of citizenship, class of admission, visa-issuing post, port of entry, and destination in the United States. Many nonimmigrants enter and leave the United States more than once each year and the NIIS system records each entry separately.

A description of the principal steps in the process of nonimmigrant admission to the United States is useful for

understanding the data produced by the NIIS system. A nonimmigrant visa is secured at a U.S. Consulate abroad (except for those entering under the Visa Waiver Pilot Program—see Nonimmigrant Admission section). These visas may be valid for multiple visits to the United States. Prior to departing for the United States, nonimmigrants are screened initially by the transportation company to insure that their documents are in order. During the trip, INS Form I-94 is distributed to non-U.S. citizens.

At the port of entry, each arriving nonimmigrant presents a visa, which usually is stamped in the passport, and a completed Form I-94 to an immigration inspector. Among other actions, the inspector checks the form for completeness, determines the length of admission, and

stamps the class of admission and port of entry on the form. The arrival portion is torn off and sent to a central data processing facility. The matching departure section of the form, usually stapled into the passport, is the nonimmigrant's proof of legal admission to the United States. This section of Form I-94, collected at departure, also is sent to the data processing facility where it is processed and matched electronically to the arrival section of the form.

Other temporary visitors

The Nonimmigrant Information System also includes information on parolees (*e.g.*, entering for humanitarian, medical, or legal reasons), withdrawals, stowaways, deferred inspections (allowed to enter to appear at an INS office where formal inspection can be completed), and refugees. Data for these classes of admission are not shown in the nonimmigrant tables but are included in summary form in footnotes to the appropriate tables. Additionally, refugee data are shown in the Refugee section and parolee data in the Parolee section of the text and tables.

Temporary visitor information not collected

The Nonimmigrant Information System also does not include data for permanent resident aliens returning after short visits abroad or for most of the millions of citizens of Canada and Mexico who cross the border for brief periods of time. Most aliens entering the United States from Canada or Mexico do not require documentation in the NIIS system. Canadians may travel for business or pleasure without travel restrictions for a period of 6 months without obtaining nonimmigrant visas. Mexicans crossing the border frequently may apply for border crossing cards, which can be used for admission to the United States for business or pleasure within 25 miles of the Southwestern border for a period not to exceed 72 hours.

Limitations of Data

A new data system was developed and put into place in mid-1996. While the new system introduced needed improvements in many of the data processing functions, start-up difficulties have led to less complete capture of

some data items for fiscal year 1996, such as port of entry and state of intended residence. The detailed tables have been appropriately footnoted, citing "processing errors" for the increased number of "unknown" for certain variables. While the total number of nonimmigrant admissions has not been affected, caution must be exercised in interpreting the data. As noted, data for fiscal year 1997 do not appear in this edition due to data inconsistencies resulting from the reengineering of both the data entry and data base management components of the Nonimmigrant Information System.

As mentioned, the data system records arrivals via collection of INS Form I-94; thus, data represent each arrival event during the year rather than the actual number of individuals admitted. Nonimmigrants in several classes of admission, often enter (and leave) many times in any given year, especially students, intracompany transferees, and visitors for business.

Changes in the procedures for processing student records, whereby certain records were prematurely moved off-line and subsequently not included in annual totals, resulted in a substantial underreporting in the number of student arrivals for 1991 through 1993. These procedures have been revised and new student arrival figures developed for these years. Table 39 reflects revised student arrival counts as well as minor differences in numbers for other classes of admission and country of last residence.

The tables on parole admissions in fiscal year 1998 use a later edition of the data than was available for production of the report, *Use of the Attorney General's Parole Authority Under the Immigration and Nationality Act: Fiscal Years 1997-1998*.

Missing information

Finally, there are gaps in the historical nonimmigrant data series due to the unavailability of arrival and departure records for July to September 1979, all of 1980, and for most characteristics for 1981 and 1982. Country of last residence and class of admission are the only variables available for 1981 and 1982. No reliable data are available for 1997.

V. NATURALIZATIONS

This section presents information on the number and characteristics of persons who naturalize in the United States.

Naturalization refers to the conferring of U.S. citizenship, by any means, upon a person after birth. (See Appendix 3, p. A.3-7.) There are five ways of becoming a U.S. citizen: naturalization in a court ceremony; naturalization through an administrative hearing; derivation through the naturalization of parents; acquisition at birth abroad to citizen parents; and legislation conferring citizenship upon certain groups of persons (see Limitations of Data). As part of the naturalization process, applicants pledge an oath of allegiance to the United States, thereby renouncing allegiance to their former countries of nationality.

U.S. Naturalization Program

To naturalize, an immigrant must fulfill certain requirements set forth in the Immigration and Nationality Act concerning age, lawful admission, and residence in the United States. These general naturalization provisions specify that an alien must: be at least 18 years of age; have been lawfully admitted to the United States for permanent residence; and have resided in the country continuously for at least 5 years. Additional requirements include the ability to speak, read, and write the English language; knowledge of the U.S. government and U.S. history; and good moral character. In 1998, immigrants naturalizing under the general provisions accounted for 96 percent of those for whom the nationality law provision was reported. (Provision of the law was not reported for 5 percent of naturalizations.)

The special provisions of naturalization law exempt aliens from one or more of the requirements of the general provisions. Spouses and children of U.S. citizens and military classes constitute the main categories of special naturalization. The majority of people naturalizing as spouses of U.S. citizens may do so in 3 years rather than the 5 years prescribed under the general provisions. Of all new citizens in 1998 with naturalization law provision reported, 4 percent naturalized under the special provisions. Children who immigrate with their parents generally do not apply to naturalize, but derive U.S. citizenship through the naturalization of their parents. Children adopted by U.S. citizens are eligible for administrative naturalization by the INS. These children

may be naturalized in court ceremonies prior to reaching age 18-there are no residency requirements. Under certain conditions, aliens who served honorably during war time and other conflicts may naturalize without prior admission to permanent resident status. Also, they need not have resided in the United States for a particular length of time. Aliens with lawful permanent resident status who have served honorably in the Armed Forces of the United States also are entitled to certain exemptions from the general naturalization requirements.

Every applicant for naturalization (age 18 and over) must file an application, Form N-400 Application for Naturalization. All aliens filing these applications who meet the preliminary documentary requirements must be interviewed by INS officers to determine their eligibility to naturalize. During the interview the officer discerns the applicant's knowledge and understanding of the English language, as well as of the history and government of the United States. Recently, applicants have been allowed to take standardized tests that are used to determine knowledge and reading and writing capabilities. Those applicants found qualified are scheduled for an oath ceremony before a judge or district director.

More than 463,000 people were naturalized during 1998.

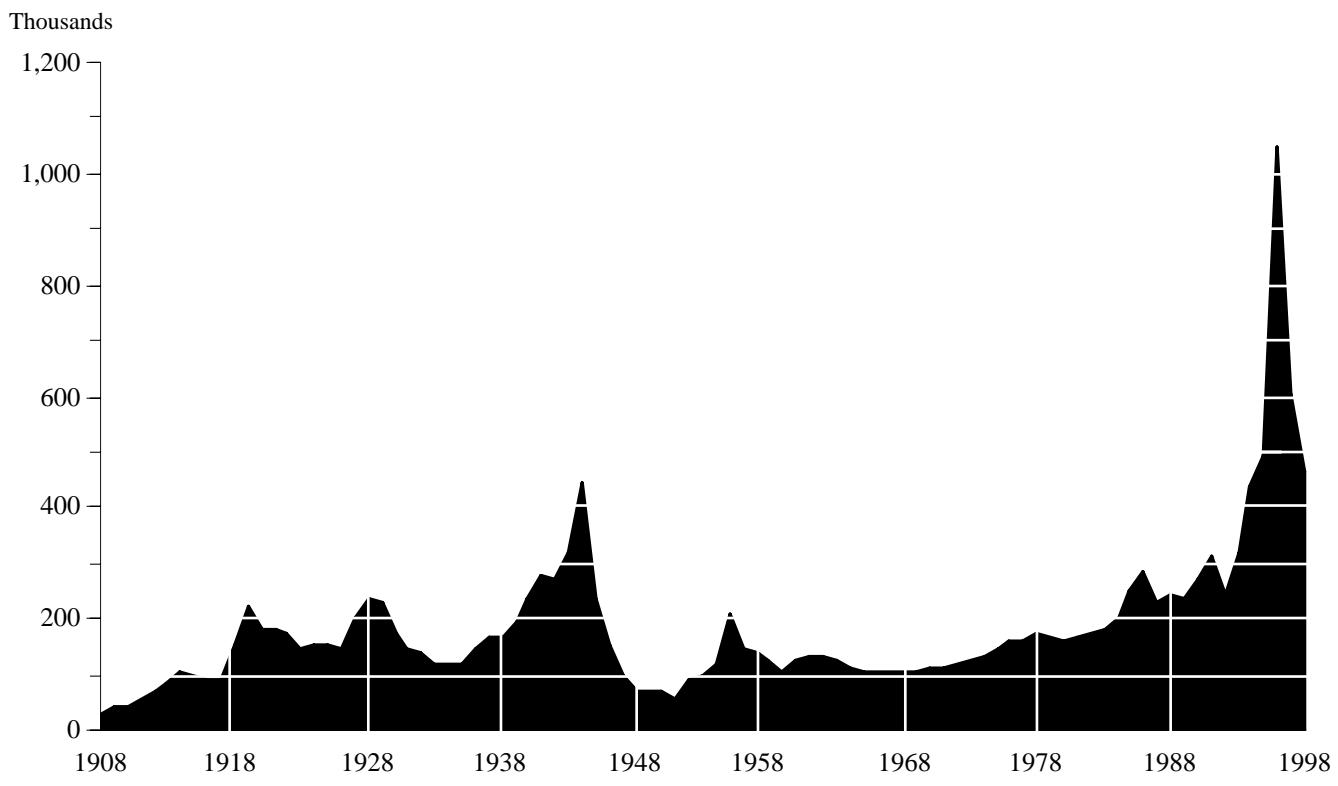

Data Overview

INS naturalized 463,060 persons in fiscal year 1998. This number would have been much higher were it not for a backlog of more than one million naturalization applications pending a decision at the end of 1997. As a consequence, caution should be exercised in drawing conclusions from these data regarding recent trends in naturalization and in the characteristics of persons naturalizing.

Despite the backlog, the number of naturalizations in 1998 was the fourth highest in U.S. history, following the all-

time record of 1,044,689 in 1996, 598,225 in 1997, and 441,979 in 1944 during World War II (Chart N). Between 1945 and 1995, the annual number of persons naturalizing never exceeded 400,000. The increase in naturalizations during the 1990s is attributable to a number of factors:

- ◆ In fiscal year 1992, the INS initiated a “Green Card Replacement Program”, which by requiring long-term permanent residents to replace their permanent resident alien cards with new, more counterfeit-resistant cards, led some to naturalize instead.
- ◆ In 1994, the first of the 2.68 million illegal aliens who were granted legal permanent resident status under the provisions of the Immigration Reform and Control Act (IRCA) of 1986 became eligible to naturalize.
- ◆ During 1994-96, legislation was passed restricting public benefits for non-citizens, including Proposition 187 in California in 1994, and the Personal Responsibility and Work Opportunity Act and the Illegal Immigration Reform and Immigrant Responsibility Act in 1996.

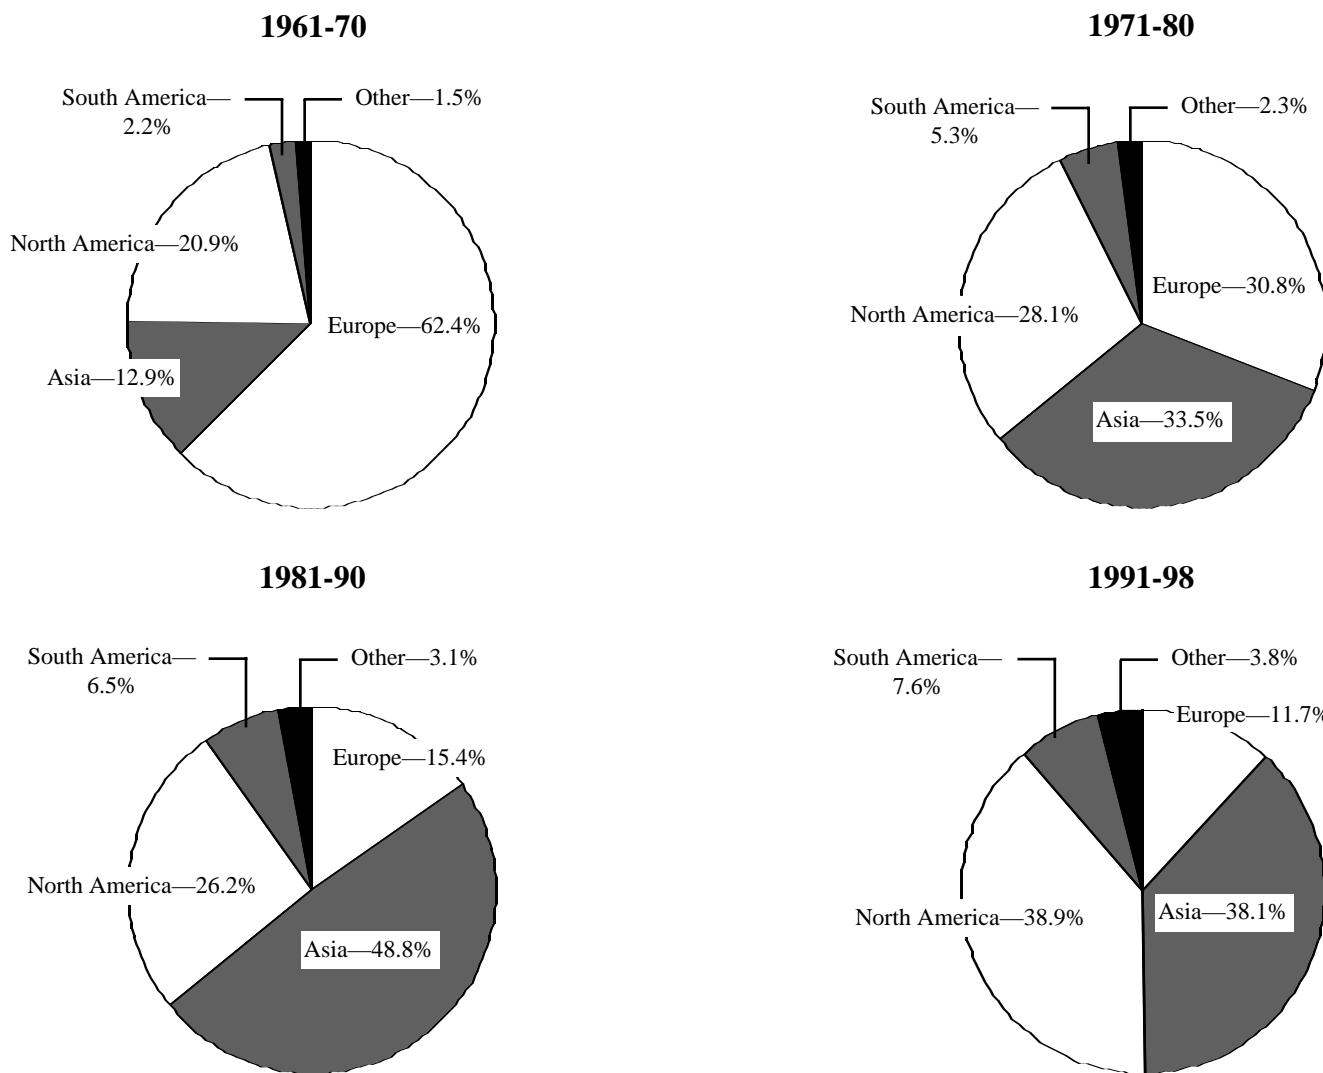

- ◆ In 1995, the INS implemented the Citizenship USA initiative, which was designed to streamline the naturalization process and greatly increased naturalizations during 1996.

Region and country of birth (Tables 50-54)

The number of persons naturalizing each year lags behind the number immigrating by at least five years due to the five-year residency requirement for naturalization for most legal immigrants. Until the 1970s, the majority of persons naturalizing were born in Europe because country quotas in immigration law favored those countries. The regional origin of persons immigrating and naturalizing shifted from Europe to Asia following the elimination of the country quotas in amendments to the Immigration and Nationality Act (INA) of 1965 and the arrival of Indochinese refugees in the 1970s. Asian immigrants also had historically higher rates of naturalization than Europeans. Between 1976 and 1995, Asia was the leading region of birth among persons naturalized.

Increases in legal immigration from North American countries, especially following the Immigration Reform and Control Act of 1986, reduced Asia's share of naturalizations. During the 1991-98 period, the proportion

of persons naturalizing who were born in Asian countries fell to 38.1 percent, while the proportion from North America climbed to 38.9 percent (Chart O). North America became the leading region of birth of persons naturalizing in 1996. In 1998, nearly one-half (45 percent) of new citizens were born in North America compared to 33.2 percent in Asian countries and 12.7 percent in Europe.

Mexico was the leading country of birth of persons naturalizing in 1998 with 112,442 or 24.3 percent of the total. Other major countries of birth for naturalizing citizens were Vietnam (30,185), the Philippines (24,872), India (17,060), the Dominican Republic (21,092), the People's Republic of China (16,145), Cuba (15,331) and Jamaica (15,040).

Immigration Reform and Control Act

Aliens legalized under IRCA accounted for 85,517 naturalizations, or 19 percent of all naturalized citizens, in 1998. The majority of IRCA legalized aliens who naturalized (67 percent) were born in Mexico. The total number of IRCA legalized aliens who had naturalized by the end of 1998 stood at 516,828, or 19 percent of the total 2.68 million.

Years in immigrant status

The median number of years of residence between the date of legal permanent residence and the date of naturalization was 9 years among aliens who naturalized in 1998. In recent years, the median has fluctuated between 8 and 9 years. Regional variation persisted in

1998. African born immigrants spent a median of 8 years in immigrant status compared with 9 years for Asians, 8 for Europeans, 10 for South Americans, and 10 years for North Americans (Table I). IRCA immigrants naturalized sooner than non-IRCA immigrants (8 years vs. 12 years, respectively).

Understanding the Data

Data Collection

The INS compiles two types of data on naturalizations: workload statistics and demographic statistics on the characteristics of persons who naturalize. Workload data include the number of naturalization applications received, the number of petitions filed, and the number of aliens approved for naturalization during a fiscal year.

Demographic data come from the naturalization application and include: date and country of birth, gender, marital status, state and metropolitan area of residence, occupation, date of admission for permanent residence, and section of naturalization law. These data are obtained from either an automated case tracking system in operation in the larger INS offices, manually coded records from the smaller offices, and, if not otherwise available, from the Central Index System (CIS) of INS.

Limitations of Data

Data on naturalization shown in the *Statistical Yearbook* are obtained from information reported on Form N-400, the application for naturalization for persons ages 18 and over. Until 1998, the data also included information from

Form N-600, the application for certificate of citizenship for children. The N-600 is optional and used to provide evidence of citizenship for children under age 18 who automatically derive or acquire citizenship through their parents. The N-600 data may have represented as many as 3-4 percent of the naturalizations reported annually through 1997.

Aliens who become U.S. citizens through the legislative process also are not covered in the naturalization data collected by the INS. A recent example of the legislative procedure occurred upon the dissolution of the Trust Territory of the Pacific through which the Northern Mariana Islands became a commonwealth of the United States, making its residents U.S. citizens.

The 1998 naturalization data understate the demand to naturalize because of a continuing backlog of applications pending a decision. The demographic characteristics of aliens whose cases were in the backlog are unknown.

In addition, the number of cases with missing data was higher in 1996 and 1997 than in previous years. This is because the Central Index System (CIS), the source of data for about 100,000 cases in 1996 and about 60,000 cases in 1997, does not maintain information on state and metropolitan area of intended residence, marital status, occupation, provision of naturalization law, country of former allegiance, and in some instances, gender. In 1996, cases with information supplied by the CIS came from areas where INS offices use manual coding systems, that is primarily states and metropolitan areas with low concentrations of immigrants.

VI. ENFORCEMENT

This section provides information about actions taken by the Immigration and Naturalization Service to prevent illegal entry into the United States and to apprehend and remove deportable aliens from the United States.

Enforcement of Immigration Laws

The Immigration and Naturalization Service (INS) has the initial responsibility for determining who may be admitted to the United States. The INS also has the responsibility for enforcing immigration laws within the United States and on the borders. These responsibilities include locating and arresting aliens who are in violation of the Immigration and Nationality Act (INA) (see Appendix 1, p. A.1-12), *i.e.*, aliens attempting an illegal entry, aliens who successfully complete an illegal entry, and aliens who entered the United States legally but have since lost their legal status. The arrests are known as apprehensions. Almost all of the work involved in locating and arresting aliens is done by either Border Patrol agents or Investigations special agents. Immigration Inspectors work to prevent the entry of inadmissible aliens at a port of entry. The custody and processing of apprehended aliens and certain of the aliens refused entry is a joint effort involving arresting agents, INS attorneys, and detention and deportation officers. Aliens refused admission or apprehended may be removed from the United States as described below.

Border Patrol

The primary mission of the U.S. Border Patrol is to secure the 8,000 miles of land and water boundaries of the United States between ports of entry. The major objectives of the Border Patrol are to prevent illegal entry into the United States, interdict drug smugglers and other criminals, and compel those persons seeking admission to present themselves legally at ports of entry for inspection. The INS "prevention through deterrence" strategy calls for deploying Border Patrol agents along the border to prevent and deter illegal entry, rather than apprehending undocumented immigrants after they have entered the United States. Border Patrol operations are divided into 21 sectors. The southwest border covers four states (California, Arizona, New Mexico, and Texas) and divides into nine sectors: San Diego and El Centro in California; Yuma and Tucson in Arizona; El Paso sector covering New Mexico and the western-most portion of Texas; and Marfa, Del Rio, Laredo, and McAllen in Texas. The

remaining 12 sectors are: Livermore in California; New Orleans in Louisiana; Miami in Florida; Havre in Montana; Blaine and Spokane in Washington; Grand Forks in North Dakota; Buffalo in New York; Swanton in Vermont; Detroit in Michigan; Ramey in Puerto Rico; and Houlton in Maine.

Investigations Program

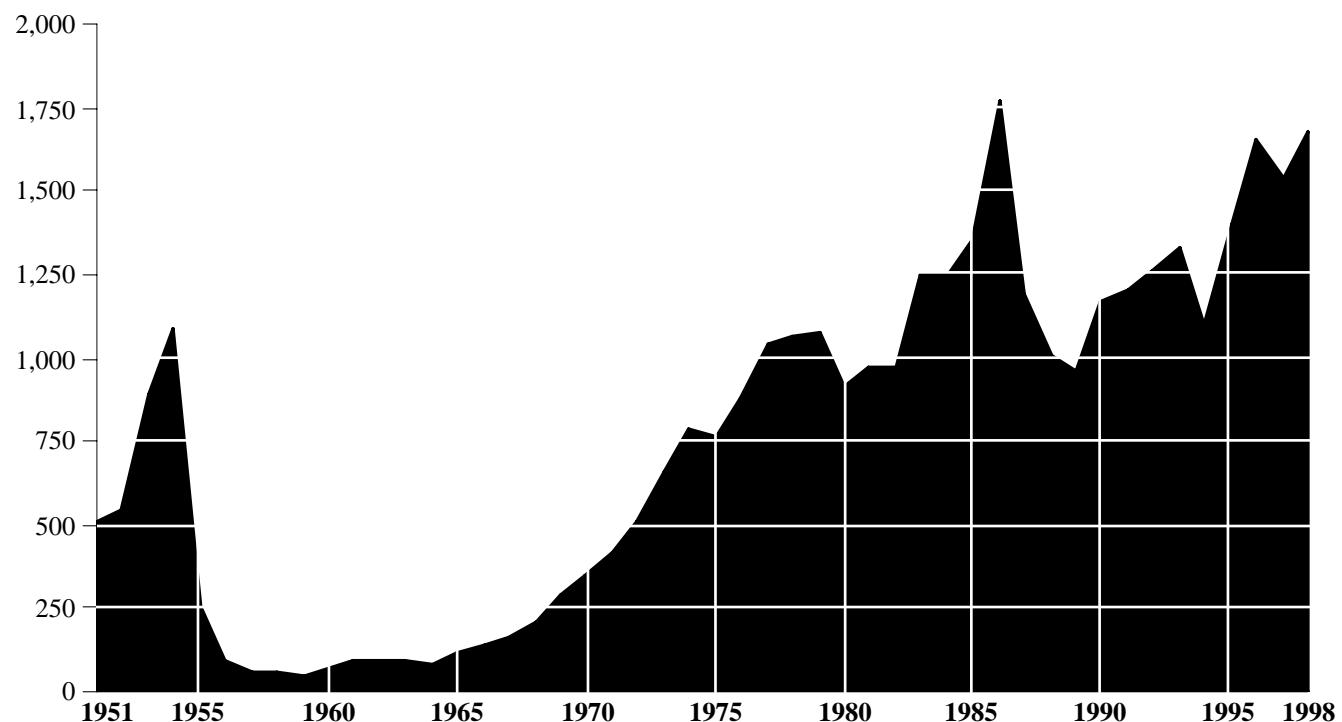

The Investigations Program focuses on the enforcement of immigration laws within the interior of the United States. Special agents plan and conduct investigations of persons and events subject to the administrative and criminal provisions of the INA. Agents use both traditional and modern technological methods, including forensic science, to investigate violations of immigration law and aliens involved in criminal activities. They often work as team members in multi-agency task forces against terrorism, violent crime, document fraud, narcotic trafficking, and various forms of organized crime. They also seek to identify aliens who are incarcerated and deportable as a result of their criminal convictions. In addition, Agents monitor and inspect work sites to apprehend unauthorized alien workers and to impose sanctions against employers who knowingly employ them. Apprehensions at places of employment may result in removals from the workplace and also can result in removal from the United States.

Inspections Program

Immigration inspectors determine the admissibility of aliens who have arrived at a designated port of entry. There are approximately 300 such ports in the United States. Inspectors may permit most inadmissible aliens the opportunity to withdraw their application for admission or in some cases inspectors will refer an alien to an immigration judge for removal proceedings. Since April 1997 inspectors have had the authority to order certain aliens removed under expedited removal proceedings without further hearings or review by an immigration judge. The expedited removal order carries the same penalties as a removal order issued by an immigration judge. Immigration inspectors also prepare cases for criminal prosecution by United States Attorneys, including cases involving alien smuggling, document fraud, and attempted illegal entry.

Detention and Removal Program

Removal proceedings encompass the actions that lead to the formal removal of an alien from the United States when the presence of that alien is deemed inconsistent with the public welfare. The INS has several options in removing an alien from the United States. Traditionally, these options included deportation, voluntary departure and exclusion; however, the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA, see Appendix 1, p. A.1-23) made major revisions to these procedures that were effective on April 1, 1997. Deportation and exclusion proceedings were consolidated as removal proceedings (with voluntary departure continuing as an option at government convenience). The most significant change was the new authority for expedited removals.

Most removal proceedings are conducted before an immigration judge. Possible outcomes of an immigration hearing include removal, adjustment to a legal status, or a

termination of proceedings. Some aliens abscond before or after the hearing. Decisions of the immigration judge can be appealed to the Board of Immigration Appeals.

Under expedited removal an immigration officer may determine that an arriving alien is inadmissible because the alien engaged in fraud or misrepresentation or because the alien lacks proper documents. The officer can order the alien removed without further hearing or review unless the alien states a fear of persecution or an intention to apply for asylum. Officers refer aliens who make such pleas to an asylum officer and the case may eventually be argued before an immigration judge.

The penalties associated with formal removal include not only the removal but possible fines, imprisonment for up to 10 years, and a bar to future legal entry (the bar is permanent for aggravated felons and up to 20 years for other aliens). The imposition and extent of these penalties depends upon the circumstances of the case.

Voluntary departure

In some cases, an apprehended alien may be offered a voluntary departure. This procedure is common with non-criminal aliens who are apprehended by the Border Patrol

during an attempted illegal entry. They agree that their entry was illegal, waive their right to a hearing, remain in custody, and are removed under supervision. Some aliens apprehended within the United States agree to voluntarily depart and pay the expense of departing. These departures may be granted by an immigration judge or, in some circumstances, by an INS District Director. Aliens who have agreed to a voluntary departure can be legally admitted in the future without penalty. Although such departures are called "voluntary departures," they are required and verified.

Data Overview: Apprehensions

(Tables 56-59)

Aliens are apprehended under three INS programs—Border Patrol, Investigations, and Examinations. The largest of these programs by far is the Border Patrol. In fiscal year 1998, the INS apprehended 1,679,439 aliens. Of this number, the Border Patrol made 1,555,776 apprehensions, of which 97 percent were made along the southwest border. During the fiscal year 1986-98 period, the Border Patrol accounted for between 92 to 97 percent of total apprehensions, Investigations for 3 to 8 percent, and Examinations for less than 1 percent. Technically, the Inspections Program does not apprehend aliens and their interceptions of inadmissible aliens are not reported in the apprehension statistics.

Southwest border apprehensions (Table 58)

Southwest border apprehensions were an all-time record 1,615,844 in fiscal year 1986 and then decreased 3 consecutive years immediately following enactment of the Immigration Reform and Control Act (IRCA) of 1986 (see Appendix 1, p. A.1-19). This legislation allowed 2.7 million formerly illegal aliens to become legal immigrants, established sanctions against employers who hire illegal aliens, and authorized an increase in the size of the Border Patrol. The number of apprehensions reached a low of 852,506 in 1989 and has generally increased since then. The only years with annual decreases were 1994 and 1997. The number of southwest border apprehensions in 1998 was 1,516,680, an 11 percent increase compared to fiscal year 1997.

Border Operations

Several major INS operations have had an impact on apprehensions over the years. These operations typically deploy agents nearer the border at strategic locations in order to deter illegal entry. The number of apprehensions tend to decrease in the targeted areas and increase in surrounding sectors.

The first initiative was Operation Hold-the-Line, in El Paso, beginning in September 1993. The second, Operation Gatekeeper, began in San Diego in October

1994. These two sectors accounted for two out of every three apprehensions along the southwest border in fiscal year 1993. The percentage dropped to 50 percent of the total in 1995, and was approximately 25 percent in fiscal year 1998.

The number of apprehensions in El Centro, CA and Tucson, AZ, the sectors east of San Diego, increased following introduction of Operation Gatekeeper. The number of apprehensions in Tucson increased from 139,473 in fiscal year 1994 to 387,406 in fiscal year 1998. El Centro increased from 27,654 in fiscal year 1994 to 226,695 in 1998. McAllen surpassed El Paso as the leading sector in number of apprehensions in Texas following Operation Hold-the-Line in fiscal year 1994, going from 124,251 in 1994 to 243,793 in 1997. Reacting to the increases, the INS began a new operation in McAllen in August 1997 called Operation Rio Grande. Apprehensions declined to 204,257 in fiscal year 1998, a 16 percent decrease compared to 1997.

Nationality (Table 57)

Nationals of 186 countries were apprehended in 1998—aliens from Mexico predominated, accounting for 96.1 percent of the total. The next largest source countries were El Salvador, Honduras, Guatemala, the Dominican Republic, Canada, Cuba, Jamaica, Colombia, Haiti, and Ecuador.

Data Overview: Investigations

(Table 60)

Investigations work is composed of four major categories—criminal, work site enforcement, fraud, and anti-smuggling.

Criminal

Criminal cases have historically represented the largest proportion of the total Investigations workload. In 1998 they account for 86 percent of cases completed. These cases have steadily increased over the years from 38,716 cases in 1992 to 87,295 in 1998, an increase of 126 percent. The targets of these investigations include large scale organizations engaged in ongoing criminal activity in violation of Title 8 or Title 18, U.S.C. or similar laws, including those pertaining to narcotics and terrorism. Criminal cases also include individual aliens convicted of a crime or crimes rendering them subject to INS action, aliens arrested for the commission of an aggravated felony, aliens involved in activities considered contrary to the security of the United States, and aliens included in certain immoral classes. Defendants prosecuted in 1998 increased 53 percent compared to the number in 1997, while the number of defendants convicted was up 46 percent.

Work site enforcement

The focus of work site enforcement is employers of aliens who are not authorized to work. Immigration law prohibits the unlawful employment of aliens and provides for penalties and fines against employers who hire, recruit, or refer aliens to employment for a fee. Employer cases may involve criminal or administrative investigations as well as general inspections. Employer cases may also originate as referrals from the Department of Labor. Total work site cases completed dropped annually from 7,053 cases in fiscal year 1992 to 5,283 in 1995, and 5,149 cases in 1996, then rose to a high of 7,795 in 1998. The number of arrests rose significantly from 7,554 in fiscal year 1994 to 17,552 in 1997, an increase of 132 percent. Arrests dropped to 13,934 in fiscal year 1998, a decrease of 21 percent. In addition, the number of warnings to employers in 1998 (642) decreased 12 percent compared to the number issued in 1997. Notices of intent to fine (1,023) increased 19 percent while the number of final orders (535) was down by 31 percent.

Fraud investigations

Fraud investigations seek to penetrate fraud schemes of all sizes and complexity that are used to violate immigration and related laws, or to shield the true status of illegal aliens in order to obtain entitlement benefits from federal, state, or local agencies. Fraud cases completed in fiscal year 1998 decreased 5 percent when compared to 1997. Of the 4,614 fraud cases completed in fiscal year 1998, 71 percent pertained to individuals involved in immigration fraud, 4 percent to large-scale organizations, 15 percent to facilitators, 6 percent to civil document fraud (INA 274C), and the remaining 4 percent to special projects and entitlement fraud. The majority of fraud cases involved immigration fraud stemming from aliens misrepresenting themselves through the misuse or absence of documents.

Anti-smuggling activities

Anti-smuggling activities of the INS include the detection, apprehension, and prosecution of alien smuggling operations. The target of these investigations are persons or entities who bring, transport, harbor, or smuggle illegal aliens into or within the United States. The targets include violators with a substantial volume of smuggled aliens or revenues from the smuggling activity, *e.g.*, organized conspiracies consisting of four or more persons, and individuals such as freelance operators who smuggle infrequently or independently, or non-professional violators who smuggle relatives, household employees, or employees of small businesses. The INS completed 2,033 smuggling investigations cases in fiscal year 1998, a 74 percent increase from the 1,171 cases completed in 1997. In 1998, the INS arrested 45,128 smuggled aliens, a 34 percent decrease from the high of 68,203 in 1995.

Data Overview: Removals

(Tables 61-69)

The most complete picture of adverse actions involving individual aliens includes aliens who withdraw their application for admission when presented with evidence of their inadmissibility, aliens who are allowed to voluntarily depart, and aliens who are formally removed with consequent penalties. The following table summarizes the activities in fiscal year 1998:

	Number of aliens
Withdrew application for admission	500,346
Accepted offer of voluntary departure	1,569,817
Formally removed (with penalties)	172,547

Withdrawal of application for admission

An immigration inspector makes the decision to permit a withdrawal of an application for admission at a port of entry. The inspector also has the authority to place an arriving alien in expedited removal proceedings (discussed below). The INS has very little data on the characteristics of those that are permitted to withdraw. In addition to withdrawals, inspectors referred an additional 11,905 aliens to hearings before an immigration judge in fiscal year 1998.

Voluntary departure (Tables 61, 62)

More than 97 percent of voluntary departures involve aliens who are apprehended by the Border Patrol and removed quickly. This statistic includes recidivists and thus is a measure of events rather than unique individuals. The INS does not currently have a centralized automated information system with the characteristics of most of these aliens. There are, however, characteristics for approximately 71,000 aliens who admitted that they had been in the United States illegally for longer than 3 days and agreed to a witnessed departure. Of this group, approximately 99 percent were aliens from Mexico; their median age was 23 years, and 93 percent were male. These aliens are probably similar to the rest of the voluntary departures but they have been in the United States for a longer period; 31 percent had been here longer than a year and another 39 percent had been here longer than a month but less than one year. One other characteristic distinguishes this longer-staying group (but not all voluntary departures); the INS located 21 percent of these aliens in institutions (generally, county jails). Those found in incarceration were granted a witnessed voluntary departure because their crimes were minor or local authorities declined to prosecute.

Formal removal (Table 61)

In fiscal year 1998 the number of formal removals was up dramatically from previous years. This increase is the result of increased resources available to the program in

recent years and the implementation of expedited removal procedures after April 1, 1997. The following table illustrates the impact of expedited removals (a subset of total removals):

Fiscal year	Total removals	Expedited removals
1993	42,469	X
1994	45,621	X
1995	50,873	X
1996	69,588	X
1997	114,292	23,484
1998	172,547	76,671

X Not applicable.

Expedited removal

Expedited removals were 44 percent of all formal removals in fiscal year 1998. Expedited removal procedures allow the INS to quickly remove certain inadmissible aliens from the United States. In fiscal year 1998 the INS used these procedures with aliens arriving at ports of entry who illegally attempted to gain admission by fraud or misrepresentation or with no entry documents or by using counterfeit, altered, or otherwise fraudulent or improper documents. Aliens placed in the expedited removal process have the opportunity to claim a fear of persecution or an intention to apply for asylum, or they may claim to have certain legal status in the United States. All cases are reviewed by a supervisor and aliens who have made certain claims may be referred to an asylum officer and ultimately to an immigration judge.

Inspectors determined that about 600,000 arriving aliens in fiscal 1998 were inadmissible. Of these about 160,000 were inadmissible for reasons that made them subject to expedited removal. However, 80,000 of those aliens were allowed to withdraw their application for admission. The remaining 80,000 were placed in expedited removal. Only about 3,000 of these aliens expressed a fear of being returned; they were referred to an asylum officer. About 86 percent of those 3,000 aliens were found to have a credible fear of persecution and were taken out of the expedited removal process and scheduled for hearings before an immigration judge.

Aliens from Mexico accounted for over 93 percent of expedited removals in fiscal year 1998. The next largest countries are Jamaica, the Dominican Republic, Canada, and Ecuador (all with less than one percent of expedited removals). Approximately 72 percent of all expedited removals occurred at one of four southwest border ports of

entry; San Ysidro, CA (43 percent), El Paso, TX (12), Calexico, CA (9) and Laredo, TX (8).

The INS collects more data on the characteristics of aliens with a formal removal than it does for the other categories of removal.

Country of citizenship (Tables 64, 65)

Aliens with a formal removal came from 171 countries in fiscal year 1998; 31 countries had more than 100 aliens removed from the United States. However, just 8 countries accounted for almost 94 percent of all formal removals. These same 8 countries have been the top countries for several years with approximately 88 percent or more of all formal removals each year since 1993.

Country	Number removed	Number of criminals
Mexico	139,135	42,789
El Salvador	5,315	1,711
Guatemala	5,120	974
Honduras	5,105	1,146
Dominican Republic	2,498	1,690
Jamaica	1,844	1,216
Colombia	1,793	1,350
Canada	889	508

Criminal activity (Table 65)

The passage of the Immigration Reform and Control Act in 1986 helped the INS focus on the removal of those aliens determined to be the greatest threat to society. In fiscal year 1986 the INS removed 1,978 aliens for criminal violations (4 percent of all removals). The removal of criminal aliens has increased greatly since then. The 1998 removal of 55,489 criminals is the largest total ever, and an increase of nearly 12 percent over 1997. The 8 countries that account for most of the removals also are the countries that accounted for 93 percent of criminals the INS removed from the United States in 1998. They have been the leading countries in this category for several years with 91 percent or more of all criminals removed each year since 1993. One significant change within the group is that the number of criminal aliens from Canada fell from 1,065 in 1993 to 393 in 1997. Since 1986, the INS has devoted an increasing proportion of resources to drug interdiction at the border and to interagency cooperative task forces designed to eliminate trafficking in illegal drugs within the United States. The INS also has increased its cooperation with other law enforcement agencies to ensure that aliens convicted of crimes and incarcerated are placed into removal proceedings during or at the end of their prison sentence.

The ten most common categories of crime in fiscal year 1998 include:

Crime	Number removed	Percent of total crimes
Dangerous drugs	26,081	47
Immigration	8,064	15
Burglary	2,955	5
Assault	2,882	5
Larceny	1,600	3
Robbery	1,587	3
Weapon offenses	1,458	3
Sexual assault	1,129	2
Stolen vehicle	1,026	2
Sex offenses.....	853	2

Administrative reason for removal

(Tables 63, 66-68)

The administrative reason for removal is the primary charge cited by an immigration judge in the order to remove an alien. There are more than 100 charges that might form the basis for a removal in 1998, but most fall into one of three main categories. Aliens who were present in the United States after making an illegal entry account for 28 percent of all aliens formally removed. Aliens who attempted entry without proper documents, or through fraud or misrepresentation, account for 46 percent and aliens with criminal charges account for 21 percent (a criminal alien as defined in the previous section may not have a criminal charge as the reason for removal if, for example, the immigration judge did not have appropriate documents from the relevant criminal justice system). This distribution is very different than previous years because of the large number of expedited removal cases; those cases are classified as attempting entry.

Immigration status at entry to the United States

At least 43 percent of all aliens with a formal removal attempted (and perhaps completed) an illegal entry between designated ports of entry. Almost 44 percent attempted to enter at a port of entry without proper documents or through fraud or misrepresentation. The remainder made legal entries but then failed to maintain status; parolees, tourists, and legal permanent residents are the largest groups in this category.

Aliens removed from the interior

The INS defines "interior" removals as the removals of aliens who had been in the United States for longer than 3 days. In fiscal year 1998 71,815 formal removals met this definition; about 42 percent of all formal removals. In addition, as noted above, 70,743 aliens were allowed an escorted voluntary departure from the interior. Another 7,124 had other types of voluntary departure. Approximately 31,000 aliens with formal removals had

been in the United States for longer than a year. Aliens apprehended in work site operations and subsequently removed from the United States are a subset of aliens removed from the interior. There were 1,916 such aliens formally removed in 1998 (an additional 8,272 were allowed a voluntary departure).

Gender and age

The median age of aliens with a formal removal in fiscal year 1998 was 26 years, down slightly from the 27 years of age typical of the last several years. That decline is due to the increasing proportion of women among aliens removed; their median age was 25 years in 1998. Between 1992 and 1995 the proportion of women was about 6 percent. The proportion of women rose to 12 percent in 1996, 16 percent in 1997, and 21 percent in 1998. Most of this increase is attributable to women from Mexico who attempted entry without proper documents or through fraud. In 1996 the special "Port Court" processing at the San Diego ports provided the resources necessary to put more arriving aliens into proceedings than had been possible before. This special processing continued until the implementation of expedited removal procedures in April 1997. In either case, larger numbers of women were intercepted as they attempted entry in the San Diego area. Women are 39 percent of all expedited removals.

Understanding the Data

Data Collection

Apprehension and voluntary departure

Apprehension data are collected on Form I-213, Record of Deportable/Inadmissible Alien. Much of the data collected establishes the identity of the individual and the circumstances of the apprehension. Some demographic data are available including country of birth, country of citizenship, gender, date of birth, and marital status. However, the Performance Analysis System (PAS, the principal automated data system for a variety of INS workload measures) captures only aggregated data on country of citizenship, location of apprehension, status at entry, length of time in the United States, and limited information on employment status. Individual INS offices report these data once a month. Statistics on the number of voluntary departures are also based on data captured on Form I-213. The data on most voluntary departures are aggregated and reported in PAS. The only data element collected is whether the alien was a Mexican national.

Voluntary departure (interior)

Data on aliens granted a voluntary departure who had been in the United States for longer than 3 days are collected from the Form I-213s for those aliens. The data capture for this special subset of aliens is not aggregated to the office level but rather maintained at the individual alien level.

Individuals removed

The data on individuals removed with a formal order of removal or given a voluntary departure under docket control are more extensive. These data are collected via the INS' automated Deportable Alien Control System (DACS). The data captured include immigration status, type of entry into the United States, reasons for removal, history of criminal activity, limited employment information, and basic demographic information such as date of birth, gender, marital status, country of birth, country of citizenship, and country to which deported. In general, these data are entered in DACS over a period of time that begins with the placing of an apprehended alien in docket control. In some INS offices most of the data entry is done at the time of case closure (removal, adjustment of status, *etc.*).

Other data

Data on drug seizures, accomplishments of the Border Patrol, accomplishments of the Investigations program, prosecutions, fines, convictions, and judicial activities are captured in PAS. As noted above, these are aggregated data updated once a month by INS offices.

Limitations of Data

Case tracking

The INS' current data systems cannot link an apprehension to its final disposition (removal, adjustment of status, *etc.*). Therefore, analysts should use caution when comparing apprehension and removal data. Apprehended aliens who choose to use the available appeals procedures will spend several months and perhaps several years in the process before final disposition of their cases. In other words, aliens apprehended in any given fiscal year are quite likely to be removed (or adjusted to legal status, *etc.*) in some future fiscal year. In addition, INS statistics on apprehensions and removals relate to events, not individuals. For example, if an alien has been apprehended three times during the fiscal year, that individual will appear three times in the apprehension statistics.

Time lags in data entry

The data on removals under docket control (formal removals) reported in this and other *Statistical Yearbooks* should be used cautiously. One problem is the time lag in reporting removals. The data in this *Yearbook* have been adjusted to reflect the actual year of removal. The data for each fiscal year require updating and cannot be considered complete for at least 4 years. For example, the removals reported during fiscal year 1998 that occurred in 1997 increased the number for fiscal year 1997 by 2.2 percent.

Changes in definitions

Another area of caution involves changes in definitions across years. For example, the INS has expanded the information about the crimes of aliens removed in recent years. This change allows the INS to more accurately count the number of criminals that it removes. The statistics in this *Yearbook* reflect these changes and update the data on criminals from fiscal year 1990 onward.

Changes in definitions and new reporting requirements may also explain some of the variations in the data concerning Investigations activities. In particular, there have been significant changes in the reporting requirements for anti-smuggling and work site enforcement activities.

Tracking system for work site enforcement

Another historical problem has been the difficulty in providing the number of work site apprehensions that have resulted in deportation or removal from the United States. Until 1997, an adequate tracking system did not exist to track the number of aliens removed from the United States who were arrested during work-site enforcement operations. Currently, the Deportable Alien Control System (DACS) and the Voluntary Returns (IVR) systems provide data but there have been data collection problems associated with the new data entry requirements.

¹ Criminal alien cases include large-scale organizations engaged in ongoing criminal activity and individual aliens convicted of crimes such as terrorism or drug trafficking.

² Employer investigations target employers of unauthorized aliens and include criminal investigations, administrative investigations, auxiliary investigations, INS Headquarters Investigation Project, and Department of Labor ESA-91.

³ Fraud investigations seek to penetrate fraud schemes of all sizes and degrees of complexity which are used to violate immigration and related laws or to shield the true status of illegal aliens in order to obtain entitlement benefits. The fraud schemes may be related to marriage fraud, immigration benefit fraud, employer sanctions document fraud, other document fraud, and entitlement fraud.

⁴ At the start of fiscal year 1996, Performance Analysis System (PAS) Anti-smuggling reporting was merged with PAS Investigations. Smuggling cases involve those which target persons or entities who bring, transport, harbor, or smuggle illegal aliens into or within the United States.

⁵ Includes Entry Without Inspection (EWI), such as stowaways, or landed crewmen who were ordered detained on board, and status violators. The latter category pertains to alien apprehensions for violating the terms of admission, e.g., staying longer in the United States than permitted. Frequently, such aliens are not themselves investigative targets, but are located during other investigations.

VII. ESTIMATES

This section presents estimates of the number of persons who leave the United States to take up residence elsewhere, as well as the number and characteristics of persons residing in this country illegally, and describes INS' efforts to develop reliable information on the total number of persons who enter the United States each year.

Although a considerable amount of detailed information is available about immigrants, temporary visitors, and other categories of international migrants to the United States, significant gaps remain in our knowledge about immigration to the United States. In some areas these deficiencies persist because of the inherent difficulty in estimating the numbers, as is the case for emigration and illegal immigration. As a result, no detailed tables on these two categories are included in the *Statistical Yearbook*.

Emigration

The collection of statistics on emigration from the United States was discontinued in 1957; no direct measure of emigration has been available since then. Estimates compiled in this country and statistics collected in other countries indicate that emigration from the United States has increased steadily since the 1950s, exceeding 100,000 per year from 1970 to 1990, and surpassing 200,000 in the 1990s. These figures are consistent with U.S. historical experience; between 1900 and 1990, approximately 38

million immigrants were admitted, and an estimated 12 million foreign-born persons emigrated.¹ That is, for every 100 immigrants admitted, roughly 30 returned home (see Table H).

The U.S. Bureau of the Census currently uses an annual emigration figure of 222,000, which includes both citizens and aliens, for computing national population estimates. Statistics (shown above) on U.S. residents migrating to other countries published by the United Nations and the Economic Commission for Europe indicate that emigration from the United States could be substantially above 200,000 annually.

Accurate, detailed, and timely estimates of emigration are needed to develop and evaluate U.S. immigration policy, to derive accurate national and local population estimates (including estimates of illegal immigration), and to

measure coverage of the decennial censuses. The sketchy data that are available indicate that emigration is a large and growing component of U.S. population change. However, partly because of inherent methodological difficulties, data on emigration from the United States are not being collected.

Illegal Immigrants²

In 1994 the INS released detailed estimates of the undocumented immigrant population residing in the United States as of October 1992.³ Those estimates were useful for a variety of purposes, including planning and policy development at the national and state level, evaluating the effects of proposed legislation, and assessing the fiscal impacts of undocumented immigration.

Over the past 2 years, the INS has revised those estimates and updated them to October 1996. The estimates presented here incorporate new data on the foreign-born population collected by the Census Bureau, improvements in the methodology recommended by the General Accounting Office (GAO), suggestions provided by outside reviewers, and further analyses of INS' data sources and estimation procedures. Revised and updated

² The estimated illegal immigrant population from the Dominican Republic shown in Table I was revised from 50,000 (shown in the 1995 *Yearbook*) to 75,000 following a review of the estimates for Dominica and the Dominican Republic.

estimates of the undocumented population have been computed for each state of residence and for nearly 100 countries of origin.

Data Overview

About 5.0 million undocumented immigrants were residing in the United States in October 1996, with a range of about 4.6 to 5.4 million. The population was estimated to be growing by about 275,000 each year, which is about 25,000 lower than the annual level of growth estimated by the INS in 1994.

California is the leading state of residence, with 2.0 million, or 40 percent of the undocumented population. The 7 states with the largest estimated numbers of undocumented immigrants—California (2.0 million), Texas (700,000), New York (540,000), Florida (350,000), Illinois (290,000), New Jersey (135,000), and Arizona (115,000)—accounted for 83 percent of the total population in October 1996.

The 5.0 million undocumented immigrants made up about 1.9 percent of the total U.S. population, with the highest percentages in California, the District of Columbia, and Texas. In the majority of states, undocumented residents comprise less than 1 percent of the population.

An estimated 5 million undocumented immigrants were residing in the United States in October 1996.

Mexico is the leading country of origin, with 2.7 million, or 54 percent, of the population. The Mexican undocumented population has grown at an average annual level of just over 150,000 since 1988. The 15 countries with 50,000 or more undocumented immigrants in 1996 accounted for 82 percent of the total population. The large majority, over 80 percent, of all undocumented immigrants are from countries in the Western Hemisphere.

About 2.1 million, or 41 percent, of the total undocumented population in 1996 are nonimmigrant overstays. That is, they entered legally on a temporary basis and failed to depart. The proportion of the undocumented population who are overstays varies considerably by country of origin. About 16 percent of the Mexican undocumented population are nonimmigrant overstays, compared to 26 percent of those from Central America, and 91 percent from all other countries.

National estimates

The total number of undocumented immigrants residing in the United States in October 1996 is estimated to be 5.0 million (Table I), with a range of about 4.6 to 5.4 million. The estimate for October 1996 is about 1.1 million higher than the revised estimate of 3.9 million for October 1992; this implies that the population grew by about 275,000 annually during the 1992-96 period, about the same as the annual growth of 281,000 estimated for the previous period. The original INS estimates for October 1992 and October 1988, released in 1994, showed average annual growth of 300,000.

The undocumented population grows at varying levels from year to year, but the data available to make these estimates do not permit the derivation of annual figures to measure year-to-year changes. However, the similar levels of growth for the 1988-92 and 1992-96 periods, 281,000 and 275,000, respectively, suggest that the overall level of growth has been fairly constant over the past decade. This

also indicates that the rate of growth of the undocumented resident population has declined since 1988.

State of residence

The estimates for states reflect the well-established pattern of geographic concentration of undocumented immigrants in the United States. As expected, California was the leading state of residence, with 2.0 million, or 40 percent, of the total number of undocumented residents in October 1996. Seven states—California (2.0 million), Texas (700,000), New York (540,000), Florida (350,000), Illinois (290,000), New Jersey (135,000), and Arizona (115,000)—accounted for 83 percent of the population in October 1996 (Table I).

The estimated undocumented population of California has grown by an average of about 100,000 annually since the end of the IRCA legalization program in 1988. More than 83 percent of total growth of the undocumented population since 1988 has occurred in the top seven states. With the

exception of Massachusetts (6,000), none of the remaining 43 states grew by more than 3,000 undocumented residents annually. In 27 states, the undocumented population grew by an average of 1,000 or less each year.

Country of origin

Mexico is the leading source country of undocumented immigration to the United States. In October 1996 an estimated 2.7 million undocumented immigrants from Mexico had established residence here (Table I). Mexican undocumented immigrants constituted about 54 percent of the total undocumented population. The estimated population from Mexico increased by just over 150,000 annually in both the 1988-92 and 1992-96 periods.

The estimated number of Mexican undocumented immigrants who arrived between 1990 and 1996 is based on data on country of birth and year of immigration collected by the Census Bureau in the March 1994, 1995, and 1996 Current Population Surveys (CPS). Demographic analysis of the CPS data indicates that approximately 230,000 undocumented Mexican immigrants established residence annually between 1990 and 1996. This is the net annual addition of undocumented Mexicans who arrived during the period. Note, however, that it does not reflect the average annual growth of the Mexican undocumented population. To compute average annual growth it is necessary to subtract the number of undocumented Mexicans who lived here in January 1990 and who emigrated, died, or adjusted to legal permanent resident status during the 1990-96 period. This last step produces the estimate cited above of just over 150,000 annual growth of the Mexican undocumented population since 1988.

In October 1996, 15 countries were each the source of 50,000 or more undocumented immigrants (Table I). The top five countries are geographically close to the United States—Mexico, El Salvador, Guatemala, Canada, and Haiti. Of the top 15 countries, only the Philippines and Poland are outside the Western Hemisphere. The estimated undocumented population from Poland has declined by more than 25 percent, from 95,000 to 70,000, since 1988, possibly reflecting changed conditions in that country over the last several years.

Although undocumented immigrants come to the United States from all countries of the world, relatively few countries add substantially to the population. The annual growth of the undocumented population can be grouped into four disparate categories: 1) Mexico, with more than half of the annual growth, adds just over 150,000 undocumented residents each year; 2) six countries—El Salvador, Guatemala, Canada, Haiti, Honduras, and the Dominican Republic—each add between 6,000 and 12,000

annually; 3) thirteen countries each add about 2,000 to 4,000 annually; and 4) the remaining approximately 200 other countries add a total of about 30,000 undocumented residents each year (Table I). A large majority of the additions each year, more than 80 percent, are from countries in the Western Hemisphere.

Estimation Procedure

Methodology

The estimates were constructed by combining detailed statistics, by year of entry, for each component of change that contributes to the undocumented immigrant population residing in the United States. For most countries of the world, the typical way of entering the undocumented population in the United States is to arrive as a nonimmigrant and stay beyond the specified period of admission. This segment of the population, referred to here as “nonimmigrant overstays”, constitutes roughly 40 percent of the undocumented immigrant population residing in the United States. The rest of the population, more widely publicized, enter surreptitiously across land borders, usually between official ports of entry. This part of the population, often referred to as EWIs (entry without inspection), includes persons from nearly every country, but a large majority of them are from Mexico; most of the rest are natives of Central American countries.

Primary sets of data

The figures presented here were constructed from five primary sets of data. Each set of data was compiled separately for 99 countries and each continent of origin.

1) *Entered before 1982*—estimates (as of October 1988) of the undocumented immigrant population who established residence in the United States before 1982 and did not legalize under the Immigration Reform and Control Act (IRCA) of 1986. The assumption used to estimate this part of the population is based on estimates developed by the Census Bureau using data from the June 1988 Current Population Survey (CPS).

2) *Net overstays*—estimates for 1982 to 1996 of the net number of nonimmigrant overstays, for 99 countries of origin, derived from INS data bases. Estimates were derived by: a) matching INS I-94 arrival/departure records; b) adjusting for the incomplete collection of departure forms; and c) subtracting the number of nonimmigrant overstays who subsequently either departed or adjusted to legal resident status.

3) *Net EWIs*—estimates of the number from each country who entered without inspection (EWI) and established residence here between 1982 and 1996. A very large majority of all EWIs are from Mexico. Average annual estimates of Mexican EWIs were derived by: a) adjusting

the CPS count of the Mexican-born population for underenumeration; b) subtracting the estimated legally resident population counted in the CPS; and c) subtracting the estimated number of net overstays.

4) *Mortality*—estimates of the annual number of deaths to the resident undocumented immigrant population. The estimates were derived using an annual crude death rate of 3.9 per 1,000, which was computed using a modified age distribution of IRCA applicants and age-specific death rates of the foreign-born population.

5) *Emigration*—estimates of the number of undocumented immigrants who resided here at the beginning of a period (either October 1988 or October 1992), and who emigrated from the United States in the following 4-year period. Estimates of emigration are based on statistics published by the Census Bureau in *Technical Paper No. 9*.

Construction of the estimates

Estimates of the undocumented immigrant population were derived for October 1988, October 1992, and October 1996 for 99 individual countries and for each continent of origin. The calculations were carried out separately for overstays and EWIs.

Estimates by state of residence

In the earlier estimates for October 1992, the state distribution of the undocumented population was based on the U.S. residence pattern of each country's applicants for legalization under IRCA; the results were summed to obtain state totals. This assumed that, for each country of origin, undocumented immigrants who resided in the United States in October 1992 had the same U.S. residence pattern as IRCA applicants from that country. The revised and updated estimates presented here incorporate the same assumption for the October 1988 undocumented population. However, it was necessary to develop new methods of deriving state estimates for October 1992 and 1996 that would reflect more recent patterns of geographic settlement.

As noted, the estimates of the undocumented population were constructed separately for overstays and EWIs. This permitted the distribution of the stay and EWI populations to states using data most appropriate for the type of population. For overstays, the cohorts that arrived in the 1988-92 and 1992-96 periods were distributed to state of residence based on annual estimates of overstays by state of destination for 1986 to 1989. For EWIs who entered during these periods, the totals were distributed to state of residence using INS statistics for the early 1990s on the destination of the beneficiaries of aliens who legalized under IRCA.

Limitations of Data

Estimating the size of a hidden population is inherently difficult. Overall, the figures presented here generally reflect the size, origin, and geographic distribution of the undocumented immigrant population residing in the United States during the mid-1990s. The estimates probably reduce the range of error for the total population to a few hundred thousand rather than a few million, which was the error range during the late 1970s and into the 1980s. The estimates for most countries should be fairly precise because they were constructed primarily from data on nonimmigrant arrivals, departures, and adjustments of status that have relatively small margins of error.

Although the estimates are based on the most reliable information available, they clearly have limitations. For example, the estimates make no allowance for students or other long-term nonimmigrants, and the estimates for some countries could be underestimated because of special circumstances (*e.g.*, Dominicans entering illegally via Puerto Rico; ships arriving undetected from China).

The figures for some countries overstate the actual undocumented population. In general, the net nonimmigrant stay figures are more likely to be overestimates than underestimates because the collection of departure forms for long-term overstays who depart probably is less complete than for those who depart within the first year.

The estimates include a large number of persons who have not been admitted for lawful permanent residence but are permitted to remain in the United States pending the determination of their status or until conditions improve in their country of origin. This category includes many of the undocumented immigrants from El Salvador, aliens from other countries in a status referred to as "deferred enforced departure", and IRCA applicants whose cases have not been finally resolved.

In a few cases, the estimates appear to be too high, but we have no basis for making downward adjustments. For example, the estimates for the Bahamas appear to be much too large because they imply that a relatively large proportion of the population is residing illegally in the United States, whereas large-scale undocumented immigration from the Bahamas has not been observed previously. In addition, the estimates shown in the 1995 *Yearbook* for Dominica were considerably higher than would be expected based on the number of IRCA applicants from Dominica. This overstatement could have occurred because of processing problems with I-94 arrival/departure documents, with the result that overstays

from Dominica are overestimated and those from the Dominican Republic underestimated. The figures shown in this edition of the *Yearbook* have been adjusted to account for this anomaly in the data used to estimate overstays.

The number of EWIs is the most difficult component to estimate with precision, and errors in this component have the largest effect on the estimated undocumented population from Mexico. In particular, the shortage of information about two components—emigration of legally resident immigrants and undercount in the CPS—makes it difficult to derive acceptable residual estimates of the number of undocumented immigrants counted in the CPS.

The estimates presented here are based on the most extensive array of figures ever compiled for the purpose; nevertheless, they should be used with caution because of

the inherent limitations in the data available for estimating the undocumented immigrant population.

Inspections

The text and table on the estimated number of aliens and citizens admitted by state and port of entry are omitted from this edition of the *Statistical Yearbook*. The largest component of the admissions is the number of persons who enter at land border ports. Information developed from survey data indicates that the estimation procedures used during the past few years at some land ports have resulted in an overstatement of the total number of entries into the United States. The methodology used to derive estimates of the number of passengers per vehicle and the proportion of aliens and U.S. citizens is being evaluated and revised. Publication of this data series is expected to resume in future years.

temporary visitors for business and pleasure; and aliens whose immigration is regulated by immigration treaty.

c. Actors, artists, lecturers, singers, nurses, ministers, professors, aliens belonging to any recognized learned profession, and aliens employed as domestic servants were placed on a nonquota basis.

34. **ACT OF MAY 11, 1922**

a. Changed from one year to five-years the residency requirement in a Western Hemisphere country.

b. Authorized fines of transportation companies for transporting an inadmissible alien unless it was deemed that inadmissibility was not known to the company and could not have been discovered with reasonable diligence.

35. **IMMIGRATION ACT OF MAY 26, 1924**
(43 *Statutes-at-Large* 153)

The first permanent limitation on immigration, established the “national origins quota system.” In conjunction with the Immigration Act of 1917, governed American immigration policy until 1952 (see the Immigration and Nationality Act of 1952).

Provisions:

a. Contained two quota provisions:

1. In effect until June 30, 1927—set the annual quota of any quota nationality at two percent of the number of foreign-born persons of such nationality resident in the continental United States in 1890 (total quota - 164,667).

2. From July 1, 1927 (later postponed to July 1, 1929) to December 31, 1952—used the national origins quota system: the annual quota for any country or nationality had the same relation to 150,000 as the number of inhabitants in the continental United States in 1920 having that national origin had to the total number of inhabitants in the continental United States in 1920.

Preference quota status was established for: unmarried children under 21; parents; spouses of U.S. citizens aged 21 and over; and for quota immigrants aged 21 and over who are skilled in agriculture, together with their wives and dependent children under age 16.

b. Nonquota status was accorded to: wives and unmarried children under 18 of U.S. citizens; natives of Western Hemisphere countries, with their families; nonimmigrants; and certain others. Subsequent amendments eliminated certain elements of this law’s inherent discrimination against women but comprehensive elimination was not achieved until 1952 (see the Immigration and Nationality Act of 1952).

c. Established the “consular control system” of immigration by mandating that no alien may be permitted entrance to the United States without an unexpired immigration visa issued by an American consular officer abroad. Thus, the State Department and the Immigration and Naturalization Service shared control of immigration.

d. Introduced the provision that, as a rule, no alien ineligible to become a citizen shall be admitted to the United States as an immigrant. This was aimed primarily at Japanese aliens.

e. Imposed fines on transportation companies who landed aliens in violation of U.S. Immigration laws.

f. Defined the term “immigrant” and designated all other alien entries into the United States as “nonimmigrant” (temporary visitor). Established classes of admission for nonimmigrant entries.

APPENDIX 2

PREFERENCE IMMIGRATION LIMITS: FISCAL YEAR 1998

The Immigration Act of 1990 (P.L. 101-649) restructured the immigrant categories of admission and made other modifications to the Immigration and Nationality Act. The 1990 Act divided the preference classes into two general categories: family-sponsored and employment-based. Limits on the number of visas issued in these two categories are determined annually.

Family-sponsored limits — The worldwide level for family-sponsored preferences is calculated as:

480,000
minus the number of aliens who were issued visas or adjusted to legal permanent residence in the previous fiscal year as
 1) immediate relatives of U.S. citizens,
 2) children born subsequent to issuance of a visa to an accompanying parent, and
 3) children born abroad to lawful permanent residents on temporary trips abroad,
plus unused employment preferences in the previous fiscal year.

The 1990 Act specifies that the family-sponsored limit may not go below a minimum of 226,000 in any year. The number of legal permanent residents issued visas or who adjusted in fiscal year 1997 under categories 1-3 listed above was 336,384, and 40,710 employment-based visas were unused in 1997. The 1998 family-sponsored limit, therefore, was set to 226,000 ($480,000 - 336,384 + 40,710 = 184,326$ which is below 226,000). The limits for each of the family-sponsored preferences and their descriptions are shown below.

Employment-based limits — The 1990 Act specifies that the worldwide limit on employment-based preference immigrants is equal to 140,000 plus unused family-preference visas in the previous year. The limit for fiscal year 1998 was set to 140,000 ($140,000 + \text{no unused family-preference visas in 1997} = 140,000$).

Per-country limits — The per-country limit on preference immigration for independent countries is set to 7 percent of the total family and employment limits ($226,000 + 140,000 = 366,000$), while dependent areas are limited to 2 percent of the total. The 1998 limit for independent foreign states was 25,620 (7 percent of 366,000) and the limit for dependencies was 7,320 (2 percent of 366,000).

Diversity limits — This classification became effective in fiscal year 1995. The annual limit is set at 55,000.

APPENDIX 2

¹ The number of immediate relatives of U.S. citizens included in these figures is assumed to be 254,000. Immediate relatives may enter without any limitation, however, the limit for family-sponsored preference immigrants in a fiscal year is equal to 480,000 minus the number of immediate relatives admitted in the preceding year. The limit of family-sponsored preference visas cannot go below a minimum of 226,000—the worldwide limit of 480,000 minus 254,000.

² Plus unused family 4th preference visas.

³ Visas not used in higher preferences may be used in these categories.

⁴ Plus unused employment 4th and 5th preference visas.

APPENDIX 3

GLOSSARY

Acquired Citizenship — Citizenship conferred at birth on children born abroad to a U.S. citizen parent(s).

Adoption — See Orphan.

Adjustment to Immigrant Status — Procedure allowing certain aliens already in the United States to apply for immigrant status. Aliens admitted to the United States in a nonimmigrant, refugee, or parolee category may have their status changed to that of lawful permanent resident if they are eligible to receive an immigrant visa and one is immediately available. In such cases, the alien is counted as an immigrant as of the date of adjustment, even though the alien may have been in the United States for an extended period of time. Beginning in October 1994, section 245(i) of the INA allowed illegal residents who were eligible for immigrant status to remain in the United States and adjust to permanent resident status by applying at an INS office and paying an additional penalty fee. Section 245(i) is no longer available unless the alien is the beneficiary of a petition under section 204 of the Act or of an application for a labor certification under section 212(a)(5)(A), filed before January 15, 1998. Prior to October 1994, most illegal residents were required to leave the United States and acquire a visa abroad from the Department of State as they are again now.

Agricultural Worker — As a nonimmigrant class of admission, an alien coming temporarily to the United States to perform agricultural labor or services, as defined by the Secretary of Labor.

Alien — Any person not a citizen or national of the United States.

Amerasian Act — Public Law 97-359 (Act of 10/22/82) provides for the immigration to the United States of certain Amerasian children. In order to qualify for benefits under this law, an alien must have been born in Cambodia, Korea, Laos, Thailand, or Vietnam after December 31, 1950, and before October 22, 1982, and have been fathered by a U.S. citizen.

Amerasian (Vietnam) — Immigrant visas are issued to Amerasians under Public Law 100-202 (Act of 12/22/87), which provides for the admission of aliens born in Vietnam after January 1, 1962, and before January 1, 1976, if the alien was fathered by a U.S. citizen. Spouses, children, and parents or guardians may accompany the alien.

Application Support Centers — INS Offices fingerprint applicants for immigration benefits. Some INS applications, such as the Application for Naturalization or the Application to Register Permanent Residence or Adjust Status, require the INS to conduct a FBI fingerprint background check on the applicant. Most applicants that require a background check will be scheduled to appear at a specific Application Support Center (ASC) or Designated Law Enforcement Agency (DLEA) for fingerprinting.

Apprehension — The arrest of a removable alien by the Immigration and Naturalization Service. Each apprehension of the same alien in a fiscal year is counted separately.

Asylee — An alien in the United States or at a port of entry who is found to be unable or unwilling to return to his or her country of nationality, or to seek the protection of that country because of persecution or a well-founded fear of persecution. Persecution or the fear thereof must be based on the alien's race, religion, nationality, membership in a particular social group, or political opinion. For persons with no nationality, the country of nationality is considered to be the country in which the alien last habitually resided. Asylees are eligible to adjust to lawful permanent resident status after one year of continuous presence in the United States. These immigrants are limited to 10,000 adjustments per fiscal year.

Beneficiaries — Aliens on whose behalf a U.S. citizen, legal permanent resident, or employer have filed a petition for such aliens to receive immigration benefits

GLOSSARY

from the U.S. Immigration and Naturalization Service. Beneficiaries generally receive a lawful status as a result of their relationship to a U.S. citizen, lawful permanent resident, or U.S. employer.

Border Crosser — An alien resident of the United States reentering the country after an absence of less than six months in Canada or Mexico, or a nonresident alien entering the United States across the Canadian border for stays of no more than six months or across the Mexican border for stays of no more than 72 hours.

Border Patrol Sector — Any one of 21 geographic areas into which the United States is divided for the Immigration and Naturalization Service's Border Patrol activities.

Business Nonimmigrant — An alien coming temporarily to the United States to engage in commercial transactions which do not involve gainful employment in the United States, i.e., engaged in international commerce on behalf of a foreign firm, not employed in the U.S. labor market, and receives no salary from U.S. sources.

Cancellation of Removal — A discretionary benefit adjusting an alien's status from that of deportable alien to one lawfully admitted for permanent residence. Application for cancellation of removal is made during the course of a hearing before an immigration judge.

Certificate of Citizenship — Identity document proving U.S. citizenship. Certificates of citizenship are issued to derivative citizens and to persons who acquired U.S. citizenship (see definitions for Acquired and Derivative Citizenship).

Child — Generally, an unmarried person under 21 years of age who is: a child born in wedlock; a stepchild, provided that the child was under 18 years of age at the time that the marriage creating the stepchild relationship occurred; a legitimated child, provided that the child was legitimated while in the legal custody of the legitimating

parent; a child born out of wedlock, when a benefit is sought on the basis of its relationship with its mother, or to its father if the father has or had a bona fide relationship with the child; a child adopted while under 16 years of age who has resided since adoption in the legal custody of the adopting parents for at least 2 years; or an orphan, under 16 years of age, who has been adopted abroad by a U.S. citizen or has an immediate-relative visa petition submitted in his/her behalf and is coming to the United States for adoption by a U.S. citizen.

Country of —

Birth: The country in which a person is born.

Chargeability: The independent country to which an immigrant entering under the preference system is accredited for purposes of numerical limitations.

Citizenship: The country in which a person is born (and has not renounced or lost citizenship) or naturalized and to which that person owes allegiance and by which he or she is entitled to be protected.

Former Allegiance: The previous country of citizenship of a naturalized U.S. citizen or of a person who derived U.S. citizenship.

(Last) Residence: The country in which an alien habitually resided prior to entering the United States.

Nationality: The country of a person's citizenship or country in which the person is deemed a national.

Crewman — A foreign national serving in a capacity required for normal operations and service on board a vessel or aircraft. Crewmen are admitted for twenty-nine days, with no extensions. Two categories of crewmen are defined in the INA: D1, departing from the United States with the vessel or aircraft on which he arrived or some other vessel or aircraft; and D2, departing from Guam with the vessel on which he arrived.

Cuban/Haitian Entrant — Status accorded 1) Cubans who entered illegally or were paroled into the United States between April 15, 1980, and October 10, 1980, and

APPENDIX 3

GLOSSARY

2) Haitians who entered illegally or were paroled into the country before January 1, 1981. Cubans and Haitians meeting these criteria who have continuously resided in the United States since before January 1, 1982, and who were known to the INS before that date, may adjust to permanent residence under a provision of the Immigration Control and Reform Act of 1986.

Deferred Inspection — See Parolee.

Departure Under Safeguards — The departure of an illegal alien from the United States which is physically observed by an Immigration and Naturalization Service official.

Deportable Alien — An alien in and admitted to the United States subject to any grounds of removal specified in the Immigration and Nationality Act. This includes any alien illegally in the United States, regardless of whether the alien entered the country by fraud or misrepresentation or entered legally but subsequently violated the terms of his or her nonimmigrant classification or status.

Deportation — The formal removal of an alien from the United States when the alien has been found removable for violating the immigration laws. Deportation is ordered by an immigration judge without any punishment being imposed or contemplated. Prior to April 1997 deportation and exclusion were separate removal procedures. The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 consolidated these procedures. After April 1, 1997, aliens in and admitted to the United States may be subject to removal based on deportability.

Derivative Citizenship — Citizenship conveyed to children through the naturalization of parents or, under certain circumstances, to foreign-born children adopted by U.S. citizen parents, provided certain conditions are met.

District — Geographic areas into which the United States and its territories are divided for the Immigration and Naturalization Service's field operations or one of three

overseas offices located in Rome, Bangkok, and Mexico City. Each District Office, headed by a District Director, has a specified service area that may include part of a state, an entire state, or many states. District Offices are where most INS field staff are located. District Offices are responsible for providing certain immigration services and benefits to people resident in their service area, and for enforcing immigration laws in that jurisdiction. Certain applications are filed directly with District Offices, many kinds of interviews are conducted at these Offices, and INS staff is available to answer questions, provide forms, etc.

Diversity — A category of immigrants replacing the earlier categories for nationals of underrepresented countries and countries adversely "affected" by the Immigration and Nationality Act Amendments of 1965 (P.L. 89-236). The annual limit on diversity immigration was 40,000 during fiscal years 1992-94, under a transitional diversity program, and 55,000 beginning in fiscal year 1995, under a permanent diversity program.

Docket Control — The INS mechanism for tracking the case status of potentially removable aliens.

Employer Sanctions — The employer sanctions provision of the Immigration Reform and Control Act of 1986 prohibits employers from hiring, recruiting, or referring for a fee aliens known to be unauthorized to work in the United States. Violators of the law are subject to a series of civil fines for violations or criminal penalties when there is a pattern or practice of violations.

Exchange Visitor — An alien coming temporarily to the United States as a participant in a program approved by the Secretary of State for the purpose of teaching, instructing or lecturing, studying, observing, conducting research, consulting, demonstrating special skills, or receiving training.

Exclusion — Prior to the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, exclusion was the

GLOSSARY

formal term for denial of an alien's entry into the United States. The decision to exclude an alien was made by an immigration judge after an exclusion hearing. Since April 1, 1997, the process of adjudicating inadmissibility may take place in either an expedited removal process or in removal proceedings before an immigration judge.

Expedited Removal — The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 authorized the INS to quickly remove certain inadmissible aliens from the United States. The authority covers aliens who are inadmissible because they have no entry documents or because they have used counterfeit, altered, or otherwise fraudulent or improper documents. The authority covers aliens who arrive in, attempt to enter, or have entered the United States without having been admitted or paroled by an immigration officer at a port-of-entry. The INS has the authority to order the removal, and the alien is not referred to an immigration judge except under certain circumstances after an alien makes a claim to legal status in the United States or demonstrates a credible fear of persecution if returned to his or her home country.

Fiance(e)s of U.S. Citizen — A nonimmigrant alien coming to the United States to conclude a valid marriage with a U.S. citizen within ninety days after entry.

Files Control Office — An Immigration and Naturalization Service field office—either a district (including INS overseas offices) or a suboffice of that district—where alien case files are maintained and controlled.

Fiscal Year — Currently, the twelve-month period beginning October 1 and ending September 30. Historically, until 1831 and from 1843-49, the twelve-month period ending September 30 of the respective year; from 1832-42 and 1850-67, ending December 31 of the respective year; from 1868-1976, ending June 30 of the respective year. The transition quarter (TQ) for 1976 covers the three-month period, July-September 1976.

Foreign Government Official — As a nonimmigrant class of admission, an alien coming temporarily to the United States who has been accredited by a foreign government to function as an ambassador, public minister, career diplomatic or consular officer, other accredited official, or an attendant, servant or personal employee of an accredited official, and all above aliens' spouses and unmarried minor (or dependent) children.

Foreign Information Media Representative — As a nonimmigrant class of admission, an alien coming temporarily to the United States as a bona fide representative of foreign press, radio, film, or other foreign information media and the alien's spouse and unmarried minor (or dependent) children.

Foreign State of Chargeability — The independent country to which an immigrant entering under the preference system is accredited. No more than 7 percent of the family-sponsored and employment-based visas may be issued to natives of any one independent country in a fiscal year. No one dependency of any independent country may receive more than 2 percent of the family-sponsored and employment-based visas issued. Since these limits are based on visa issuance rather than entries into the United States, and immigrant visas are valid for 6 months, there is not total correspondence between these two occurrences. Chargeability is usually determined by country of birth. Exceptions are made to prevent the separation of family members when the limitation for the country of birth has been met.

General Naturalization Provisions — The basic requirements for naturalization that every applicant must meet, unless a member of a special class. General provisions require an applicant to be at least 18 years of age and a lawful permanent resident with five years of continuous residence in the United States, have been physically present in the country for half that period, and establish good moral character for at least that period.

APPENDIX 3

GLOSSARY

Geographic Area of Chargeability — Any one of five regions—Africa, East Asia, Latin America and the Caribbean, Near East and South Asia, and the former Soviet Union and Eastern Europe—into which the world is divided for the initial admission of refugees to the United States. Annual consultations between the Executive Branch and the Congress determine the ceiling on the number of refugees who can be admitted to the United States from each area. Beginning in fiscal year 1987, an unallocated reserve was incorporated into the admission ceilings.

Hemispheric Ceilings — Statutory limits on immigration to the United States in effect from 1968 to October 1978. Mandated by the Immigration and Nationality Act Amendments of 1965, the ceiling on immigration from the Eastern Hemisphere was set at 170,000, with a per-country limit of 20,000. Immigration from the Western Hemisphere was held to 120,000, without a per-country limit until January 1, 1977. The Western Hemisphere was then made subject to a 20,000 per country limit. Effective October 1978, the separate hemisphere limits were abolished in favor of a worldwide limit.

Immediate Relatives — Certain immigrants who because of their close relationship to U.S. citizens are exempt from the numerical limitations imposed on immigration to the United States. Immediate relatives are: spouses of citizens, children (under 21 years of age and unmarried) of citizens, and parents of citizens 21 years of age or older.

Immigrant — See Permanent Resident Alien

Immigration Act of 1990 — Public Law 101-649 (Act of November 29, 1990), which increased the limits on legal immigration to the United States, revised all grounds for exclusion and deportation, authorized temporary protected status to aliens of designated countries, revised and established new nonimmigrant

admission categories, revised and extended the Visa Waiver Pilot Program, and revised naturalization authority and requirements.

Immigration Judge — An attorney appointed by the Attorney General to act as an administrative judge within the Executive Office for Immigration Review. They are qualified to conduct specified classes of proceedings, including removal proceedings.

INA — See Immigration and Nationality Act.

Immigration and Nationality Act — The Act (INA), which, along with other immigration laws, treaties, and conventions of the United States, relates to the immigration, temporary admission, naturalization, and removal of aliens.

Immigration Marriage Fraud Amendments of 1986 — Public Law 99-639 (Act of 11/10/86), which was passed in order to deter immigration-related marriage fraud. Its major provision stipulates that aliens deriving their immigrant status based on a marriage of less than two years are conditional immigrants. To remove their conditional status the immigrants must apply at an Immigration and Naturalization Service office during the 90-day period before their second-year anniversary of receiving conditional status. If the aliens cannot show that the marriage through which the status was obtained was and is a valid one, their conditional immigrant status may be terminated and they may become deportable.

Immigration Reform and Control Act (IRCA) of 1986 — Public Law 99-603 (Act of 11/6/86), which was passed in order to control and deter illegal immigration to the United States. Its major provisions stipulate legalization of undocumented aliens who had been continuously unlawfully present since 1982, legalization of certain agricultural workers, sanctions for employers who knowingly hire undocumented workers, and increased enforcement at U.S. borders.

GLOSSARY

Inadmissible — An alien seeking admission at a port of entry who does not meet the criteria in the INA for admission. The alien may be placed in removal proceedings or, under certain circumstances, allowed to withdraw his or her application for admission.

Industrial Trainee — See Temporary Worker.

International Representative — As a nonimmigrant class of admission, an alien coming temporarily to the United States as a principal or other accredited representative of a foreign government (whether officially recognized or not recognized by the United States) to an international organization, an international organization officer or employee, and all above aliens' spouses and unmarried minor (or dependent) children.

Intracompany Transferee — An alien, employed for at least one continuous year out of the last three by an international firm or corporation, who seeks to enter the United States temporarily in order to continue to work for the same employer, or a subsidiary or affiliate, in a capacity that is primarily managerial, executive, or involves specialized knowledge, and the alien's spouse and minor unmarried children.

IRCA — See Immigration Reform and Control Act of 1986.

Labor Certification — Requirement for U.S. employers seeking to employ certain persons whose immigration to the United States is based on job skills or nonimmigrant temporary workers coming to perform services for which qualified authorized workers are unavailable in the United States. Labor certification is issued by the Secretary of Labor and contains attestations by U.S. employers as to the numbers of U.S. workers available to undertake the employment sought by an applicant, and the effect of the alien's employment on the wages and working conditions of U.S. workers similarly employed. Determination of labor availability in the United States is made at the time of a visa application and at the location where the applicant wishes to work.

Legalization Dependents — A maximum of 55,000 visas were issued to spouses and children of aliens legalized under the provisions of the Immigration Reform and Control Act of 1986 in each of fiscal years 1992-94.

Legalized Aliens — Certain illegal aliens who were eligible to apply for temporary resident status under the legalization provision of the Immigration Reform and Control Act of 1986. To be eligible, aliens must have continuously resided in the United States in an unlawful status since January 1, 1982, not be excludable, and have entered the United States either 1) illegally before January 1, 1982, or 2) as temporary visitors before January 1, 1982, with their authorized stay expiring before that date or with the Government's knowledge of their unlawful status before that date. Legalization consists of two stages—temporary and then permanent residency. In order to adjust to permanent status aliens must have had continuous residence in the United States, be admissible as an immigrant, and demonstrate at least a minimal understanding and knowledge of the English language and U.S. history and government.

Medical and Legal Parolee — See Parolee.

Metropolitan Statistical Areas (MSAs) — MSAs consist of a core area with a large population and adjacent communities having a high degree of social and economic integration with the core. They are defined by the U.S. Office of Management and Budget (OMB). MSAs are generally counties (cities and towns in New England) containing at least one city or urbanized area with a population of at least 50,000 and a total metropolitan population of at least 100,000 (75,000 in New England). MSAs of one million or more population may be recognized as Consolidated Metropolitan Statistical Areas (CMSAs). Primary Metropolitan Statistical Areas (PSMAs) are component areas within MSAs. New England County Metropolitan Areas (NECMAs) are the county based metropolitan alternative of the New England states for the city and town based MSAs and CMSAs.

APPENDIX 3

GLOSSARY

Migrant — A person who leaves his/her country of origin to seek residence in another country.

NACARA — Nicaraguan Adjustment and Central American Relief Act, Public Law 105-100 (Act of 11/19/97). Pertains to certain Central American and other aliens who were long-term illegal residents in the United States when hardship relief rules were made more stringent by the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA). Provisions: 1) allowed approximately 150,000 Nicaraguans and 5,000 Cubans adjustment to permanent resident status without having to make any hardship showing; 2) allowed approximately 200,000 Salvadorans and 50,000 Guatemalans as well as certain aliens from the former Soviet Union to seek hardship relief under more lenient hardship rules than existed prior to IIRIRA amendments.

National — A person owing permanent allegiance to a state.

NATO Official — As a nonimmigrant class of admission, an alien coming temporarily to the United States as a member of the armed forces or as a civilian employed by the armed forces on assignment with a foreign government signatory to NATO (North Atlantic Treaty Organization), and the alien's spouse and unmarried minor (or dependent) children.

Naturalization — The conferring, by any means, of citizenship upon a person after birth.

Naturalization Application — The form used by a lawful permanent resident to apply for U.S. citizenship. The application is filed with the Immigration and Naturalization Service at the Service Center with jurisdiction over the applicant's place of residence.

Nonimmigrant — An alien who seeks temporary entry to the United States for a specific purpose. The alien must have a permanent residence abroad (for most classes of admission) and qualify for the nonimmigrant classification sought. The nonimmigrant classifications

include: foreign government officials, visitors for business and for pleasure, aliens in transit through the United States, treaty traders and investors, students, international representatives, temporary workers and trainees, representatives of foreign information media, exchange visitors, fiance(e)s of U.S. citizens, intracompany transferees, NATO officials, religious workers, and some others. Most nonimmigrants can be accompanied or joined by spouses and unmarried minor (or dependent) children.

Nonpreference Category — Nonpreference visas were available to qualified applicants not entitled to a visa under the preferences until the category was eliminated by the Immigration Act of 1990. Nonpreference visas for persons not entitled to the other preferences had not been available since September 1978 because of high demand in the preference categories. An additional 5,000 nonpreference visas were available in each of fiscal years 1987 and 1988 under a provision of the Immigration Reform and Control Act of 1986. This program was extended into 1989, 1990, and 1991 with 15,000 visas issued each year. Aliens born in countries from which immigration was adversely affected by the Immigration and Nationality Act Amendments of 1965 (Public Law 89-236) were eligible for the special nonpreference visas.

North American Free-Trade Agreement (NAFTA) — Public Law 103-182 (Act of 12/8/93), superseded the United States-Canada Free-Trade Agreement as of 1/1/94. It continues the special, reciprocal trading relationship between the United States and Canada (see United States-Canada Free-Trade Agreement), and establishes a similar relationship with Mexico.

Numerical Limit, Exempt from — Those aliens accorded lawful permanent residence who are exempt from the provisions of the flexible numerical limit of 675,000 set by the Immigration Act of 1990. Exempt categories include immediate relatives of U.S. citizens, refugees, asylees (limited to 10,000 per year by section 209(b) of the Immigration and Nationality Act), Amerasians, aliens adjusted under the legalization

GLOSSARY

provisions of the Immigration Reform and Control Act of 1986, and certain parolees from the former Soviet Union and Indochina.

Nursing Relief Act of 1989 — Public Law 101-238 (Act of 12/18/89), provides for the adjustment to permanent resident status of certain nonimmigrants who as of September 1, 1989, had H-1 nonimmigrant status as registered nurses; who had been employed in that capacity for at least 3 years; and whose continued nursing employment meets certain labor certification requirements.

Occupation — For an alien entering the United States or adjusting without a labor certification, occupation refers to the employment held in the country of last legal residence or in the United States. For an alien with a labor certification, occupation is the employment for which certification has been issued.

Orphan — For immigration purposes, a child whose parents have died or disappeared, or who has been abandoned or otherwise separated from both parents. An orphan may also be a child whose sole or surviving parent is incapable of providing that child with proper care and who has, in writing, irrevocably released the child for emigration and adoption. In order to qualify as an immediate relative, the orphan must be under the age of sixteen at the time a petition is filed on his or her behalf. To enter the United States, an orphan must have been adopted abroad by a U.S. citizen (and spouse, if married) or be coming to the United States for adoption by a citizen.

Panama Canal Act Immigrants — Three categories of special immigrants established by Public Law 96-70 (Act of 9/27/79): 1) certain former employees of the Panama Canal Company or Canal Zone Government, their spouses and accompanying children; 2) certain former employees of the U.S. Government in the Panama Canal Zone who are Panamanian nationals, their spouses and children; and 3) certain former employees of the Panama

Canal Company or Canal Zone Government on April 1, 1979, their spouses and children. The Act provides for admission of a maximum of 15,000 immigrants, at a rate of no more than 5,000 each year.

Parolee — A parolee is an alien, appearing to be inadmissible to the inspecting officer, allowed into the United States for urgent humanitarian reasons or when that alien's entry is determined to be for significant public benefit. Parole does not constitute a formal admission to the United States and confers temporary status only, requiring parolees to leave when the conditions supporting their parole cease to exist. Types of parolees include:

1) *Deferred inspection*: authorized at the port upon alien's arrival; may be conferred by an immigration inspector when aliens appear at a port of entry with documentation, but after preliminary examination, some question remains about their admissibility which can best be answered at their point of destination.

2) *Advance parole*: authorized at an INS District office in advance of alien's arrival; may be issued to aliens residing in the United States in other than lawful permanent resident status who have an unexpected need to travel and return, and whose conditions of stay do not otherwise allow for readmission to the United States if they depart.

3) *Port-of-entry parole*: authorized at the port upon alien's arrival; applies to a wide variety of situations and is used at the discretion of the supervisory immigration inspector, usually to allow short periods of entry. Examples include allowing aliens who could not be issued the necessary documentation within the required time period, or who were otherwise inadmissible, to attend a funeral and permitting the entry of emergency workers, such as fire fighters, to assist with an emergency.

4) *Humanitarian parole*: authorized at INS headquarters for "urgent humanitarian reasons" specified in the law. It is used in cases of medical emergency and comparable situations.

APPENDIX 3

GLOSSARY

5) *Public interest parole:* authorized at INS headquarters for “significant public benefit” specified in the law. It is generally used for aliens who enter to take part in legal proceedings.

6) *Overseas parole:* authorized at an INS District or suboffice while the alien is still overseas; designed to constitute long-term admission to the United States. In recent years, most of the aliens the INS has processed through overseas parole have arrived under special legislation or international migration agreements.

Per-Country Limit — The maximum number of family-sponsored and employment-based preference visas that can be issued to citizens of any country in a fiscal year. The limits are calculated each fiscal year depending on the total number of family-sponsored and employment-based visas available. No more than 7 percent of the visas may be issued to natives of any one independent country in a fiscal year; no more than 2 percent may be issued to any one dependency of any independent country. The per-country limit does not indicate, however, that a country is entitled to the maximum number of visas each year, just that it cannot receive more than that number. Because of the combined workings of the preference system and per-country limits, most countries do not reach this level of visa issuance.

Permanent Resident Alien — An alien admitted to the United States as a lawful permanent resident. Permanent residents are also commonly referred to as immigrants; however, the Immigration and Nationality Act (INA) broadly defines an immigrant as any alien in the United States, except one legally admitted under specific nonimmigrant categories (INA section 101(a)(15)). An illegal alien who entered the United States without inspection, for example, would be strictly defined as an immigrant under the INA but is not a permanent resident alien. Lawful permanent residents are legally accorded the privilege of residing permanently in the United States. They may be issued immigrant visas by the Department of State overseas or adjusted to permanent resident status by the Immigration and Naturalization Service in the United States.

Port of Entry — Any location in the United States or its territories that is designated as a point of entry for aliens and U.S. citizens. All district and files control offices are also considered ports, since they become locations of entry for aliens adjusting to immigrant status.

Pre-inspection — Complete immigration inspection of airport passengers before departure from a foreign country. No further immigration inspection is required upon arrival in the United States other than submission of INS Form I-94 for nonimmigrant aliens.

Preference System (prior to fiscal year 1992) — The six categories among which 270,000 immigrant visa numbers were distributed each year during the period 1981-91. This preference system was amended by the Immigration Act of 1990, effective fiscal year 1992. (see Preference System—Immigration Act of 1990). The six categories were: 1) unmarried sons and daughters (over 21 years of age) of U.S. citizens (20 percent); 2) spouses and unmarried sons and daughters of aliens lawfully admitted for permanent residence (26 percent); 3) members of the professions or persons of exceptional ability in the sciences and arts (10 percent); 4) married sons and daughters of U.S. citizens (10 percent); 5) brothers and sisters of U.S. citizens over 21 years of age (24 percent); and 6) needed skilled or unskilled workers (10 percent). A nonpreference category, historically open to immigrants not entitled to a visa number under one of the six preferences just listed, had no numbers available beginning in September 1978.

Preference System (Immigration Act of 1990) — The nine categories since fiscal year 1992 among which the family-sponsored and employment-based immigrant preference visas are distributed. The family-sponsored preferences are: 1) unmarried sons and daughters of U.S. citizens; 2) spouses, children, and unmarried sons and daughters of permanent resident aliens; 3) married sons and daughters of U.S. citizens; 4) brothers and sisters of U.S. citizens. The employment-based preferences are: 1) priority workers (persons of extraordinary ability,

GLOSSARY

outstanding professors and researchers, and certain multinational executives and managers); 2) professionals with advanced degrees or aliens with exceptional ability; 3) skilled workers, professionals (without advanced degrees), and needed unskilled workers; 4) special immigrants; and 5) employment creation immigrants (investors).

Principal Alien — The alien who applies for immigrant status and from whom another alien may derive lawful status under immigration law or regulations (usually spouses and minor unmarried children).

Refugee — Any person who is outside his or her country of nationality who is unable or unwilling to return to that country because of persecution or a well-founded fear of persecution. Persecution or the fear thereof must be based on the alien's race, religion, nationality, membership in a particular social group, or political opinion. People with no nationality must generally be outside their country of last habitual residence to qualify as a refugee. Refugees are subject to ceilings by geographic area set annually by the President in consultation with Congress and are eligible to adjust to lawful permanent resident status after one year of continuous presence in the United States.

Refugee Approvals — The number of refugees approved for admission to the United States during a fiscal year. Immigration and Naturalization Service officers in overseas offices make refugee approvals.

Refugee Arrivals — The number of refugees the Immigration and Naturalization Service initially admits to the United States through ports of entry during a fiscal year.

Refugee Authorized Admissions — The maximum number of refugees allowed to enter the United States in a given fiscal year. As set forth in the Refugee Act of 1980 (Public Law 96-212) the President determines the annual figure after consultations with Congress.

Refugee-Parolee — A qualified applicant for conditional entry, between February 1970 and April 1980, whose application for admission to the United States could not be approved because of inadequate numbers of seventh preference visas. As a result, the applicant was paroled into the United States under the parole authority granted the Attorney General.

Regional Offices — The three INS Regional Offices that supervise the work of INS Districts and Border Patrol Sectors. The Regional Directors report to the Executive Associate Commissioner for Field Operations in INS Headquarters, Washington, DC. The three Regional Offices are located in (Eastern Region) Burlington, VT, (Central Region) Dallas, TX, and (Western Region) Laguna Nigel, CA.

Registry Date — Aliens who have continuously resided in the United States since January 1, 1972, are of good moral character, and are not inadmissible, are eligible to adjust to legal permanent resident status under the registry provision. Before the Immigration Reform and Control Act of 1986 amended the date, aliens had to have been in the country continuously since June 30, 1948, to qualify.

Removal — The expulsion of an alien from the United States. This expulsion may be based on grounds of inadmissibility or deportability.

Required Departure — See Voluntary Departure.

Resettlement — Permanent relocation of refugees in a place outside their country of origin to allow them to establish residence and become productive members of society there. Refugee resettlement is accomplished with the direct assistance of private voluntary agencies working with the Department of Health and Human Services Office of Refugee Resettlement.

Safe Haven — Temporary refuge given to migrants who have fled their countries of origin to seek protection or

APPENDIX 3

GLOSSARY

relief from persecution or other hardships, until they can return to their countries safely or, if necessary until they can obtain permanent relief from the conditions they fled.

Service Centers — Four offices established to handle the filing, data entry, and adjudication of certain applications for immigration services and benefits. The applications are mailed to INS Service Centers—Service Centers are not staffed to receive walk-in applications or questions.

Special Agricultural Workers (SAW) — Aliens who performed labor in perishable agricultural commodities for a specified period of time and were admitted for temporary and then permanent residence under a provision of the Immigration Reform and Control Act of 1986. Up to 350,000 aliens who worked at least 90 days in each of the 3 years preceding May 1, 1986 were eligible for Group I temporary resident status. Eligible aliens who qualified under this requirement but applied after the 350,000 limit was met and aliens who performed labor in perishable agricultural commodities for at least 90 days during the year ending May 1, 1986 were eligible for Group II temporary resident status. Adjustment to permanent resident status is essentially automatic for both groups; however, aliens in Group I were eligible on December 1, 1989 and those in Group II were eligible one year later on December 1, 1990.

Special Immigrants — Certain categories of immigrants who were exempt from numerical limitation before fiscal year 1992 and subject to limitation under the employment-based fourth preference beginning in 1992; persons who lost citizenship by marriage; persons who lost citizenship by serving in foreign armed forces; ministers of religion and other religious workers, their spouses and children; certain employees and former employees of the U.S. Government abroad, their spouses and children; Panama Canal Act immigrants; certain foreign medical school graduates, their spouses and children; certain retired employees of international organizations, their spouses and children; juvenile court dependents; and certain aliens serving in the U.S. Armed Forces, their spouses and children.

Special Naturalization Provisions — Provisions covering special classes of persons whom may be naturalized even though they do not meet all the general requirements for naturalization. Such special provisions allow: 1) wives or husbands of U.S. citizens to file for naturalization after three years of lawful permanent residence instead of the prescribed five years; 2) a surviving spouse of a U.S. citizen who served in the armed forces to file his or her naturalization application in any district instead of where he/she resides; and 3) children of U.S. citizen parents to be naturalized without meeting certain requirements or taking the oath, if too young to understand the meaning. Other classes of persons who may qualify for special consideration are former U.S. citizens, servicemen, seamen, and employees of organizations promoting U.S. interests abroad.

Stateless — Having no nationality.

Stowaway — An alien coming to the United States surreptitiously on an airplane or vessel without legal status of admission. Such an alien is subject to denial of formal admission and return to the point of embarkation by the transportation carrier.

Student — As a nonimmigrant class of admission, an alien coming temporarily to the United States to pursue a full course of study in an approved program in either an academic (college, university, seminary, conservatory, academic high school, elementary school, other institution, or language training program) or a vocational or other recognized nonacademic institution.

Suboffices — Offices found in some Districts that serve a portion of the District's jurisdiction. A Suboffice, headed by an Officer-in-Charge, provides many services and enforcement functions. Their locations are determined, in part, to increase convenience to INS' customers.

Subject to the Numerical Limit — Categories of legal immigrants subject to annual limits under the provisions

GLOSSARY

of the flexible numerical limit of 675,000 set by the Immigration Act of 1990. The largest categories are: family-sponsored preferences; employment-based preferences; and diversity immigrants.

Temporary Protected Status (TPS) — Establishes a legislative basis for allowing a group of persons temporary refuge in the United States. Under a provision of the Immigration Act of 1990, the Attorney General may designate nationals of a foreign state to be eligible for TPS with a finding that conditions in that country pose a danger to personal safety due to ongoing armed conflict or an environmental disaster. Grants of TPS are initially made for periods of 6 to 18 months and may be extended depending on the situation. Removal proceedings are suspended against aliens while they are in Temporary Protected Status.

Temporary Resident — See Nonimmigrant.

Temporary Worker — An alien coming to the United States to work for a temporary period of time. The Immigration Reform and Control Act of 1986 and the Immigration Act of 1990, as well as other legislation, revised existing classes and created new classes of nonimmigrant admission. Nonimmigrant temporary worker classes of admission are as follows:

- 1) H-1A—registered nurses (valid from 10/1/1990 through 9/30/1995);
- 2) H-1B—workers with “specialty occupations” admitted on the basis of professional education, skills, and/or equivalent experience;
- 3) H-1C—registered nurses to work in areas with a shortage of health professionals under the Nursing Relief for Disadvantaged Areas Act of 1999;
- 4) H-2A—temporary agricultural workers coming to the United States to perform agricultural services or labor of a temporary or seasonal nature when authorized workers are unavailable in the United States;
- 5) H-2B—temporary non-agricultural workers coming to the United States to perform temporary services or

labor if unemployed persons capable of performing the service or labor cannot be found in the United States;

- 6) H-3—aliens coming temporarily to the United States as trainees, other than to receive graduate medical education or training;
- 7) O-1, O-2, O-3—temporary workers with extraordinary ability or achievement in the sciences, arts, education, business, or athletics; those entering solely for the purpose of accompanying and assisting such workers; and their spouses and children;
- 8) P-1, P-2, P-3, P-4—athletes and entertainers at an internationally recognized level of performance; artists and entertainers under a reciprocal exchange program; artists and entertainers under a program that is “culturally unique”; and their spouses and children;
- 9) Q-1, Q-2, Q-3—participants in international cultural exchange programs; participants in the Irish Peace Process Cultural and Training Program; and spouses and children of Irish Peace Process participants;
- 10) R-1, R-2—temporary workers to perform work in religious occupations and their spouses and children.

See other sections of this Glossary for definitions of Exchange Visitor, Intracompany Transferee, and U.S.-Canada or North American Free-Trade Agreement classes of nonimmigrant admission.

Transit Alien — An alien in immediate and continuous transit through the United States, with or without a visa, including, 1) aliens who qualify as persons entitled to pass in transit to and from the United Nations Headquarters District and foreign countries and 2) foreign government officials and their spouses and unmarried minor (or dependent) children in transit.

Transition Quarter — The three-month period—July 1 through September 30, 1976—between fiscal year 1976 and fiscal year 1977. At that time, the fiscal year definition shifted from July 1-June 30 to October 1-September 30.

APPENDIX 3

GLOSSARY

Transit Without Visa (TWOV) — A transit alien traveling without a nonimmigrant visa under section 233 of the INA. An alien admitted under agreements with a transportation line, which guarantees his immediate and continuous passage to a foreign destination. (See Transit Alien.)

Treaty Trader or Investor — As a nonimmigrant class of admission, an alien coming to the United States, under the provisions of a treaty of commerce and navigation between the United States and the foreign state of such alien, to carry on substantial trade or to direct the operations of an enterprise in which he/she has invested a substantial amount of capital, and the alien's spouse and unmarried minor children.

Underrepresented Countries, Natives of — The Immigration Amendments of 1988, Public Law 101-658 (Act of 11/5/88) allowed for 10,000 visas to be issued to natives of underrepresented countries in each of fiscal years 1990 and 1991. Under-represented countries are defined as countries that received less than 25 percent of the maximum allowed under the country limitations (20,000 for independent countries and 5,000 for dependencies) in fiscal year 1988. (See Diversity.)

United States-Canada Free-Trade Agreement — Public Law 100-449 (Act of 9/28/88) established a special, reciprocal trading relationship between the United States and Canada. It provided two new classes of nonimmigrant admission for temporary visitors to the United States-Canadian citizen business persons and their spouses and unmarried minor children. Entry is facilitated for visitors seeking classification as visitors for business, treaty traders or investors, intracompany transferees, or other business people engaging in

activities at a professional level. Such visitors are not required to obtain nonimmigrant visas, prior petitions, labor certifications, or prior approval but must satisfy the inspecting officer they are seeking entry to engage in activities at a professional level and that they are so qualified. The United States-Canada Free-Trade Agreement was superseded by the North American Free-Trade Agreement (NAFTA) as of 1/1/94.

Visa Waiver Pilot Program — Allows citizens of certain selected countries, traveling temporarily to the United States under the nonimmigrant admission classes of visitors for pleasure and visitors for business, to enter the United States without obtaining nonimmigrant visas. Admission is for no more than 90 days. The program was instituted by the Immigration Reform and Control Act of 1986 (entries began 7/1/88). Under the Guam Visa Waiver Pilot Program, certain visitors from designated countries may visit Guam only for up to 15 days without first having to obtain nonimmigrant visitor visas.

Voluntary Departure — The departure of an alien from the United States without an order of removal. The departure may or may not have been preceded by a hearing before an immigration judge. An alien allowed to voluntarily depart concedes removability but does not have a bar to seeking admission at a port-of-entry at any time. Failure to depart within the time granted results in a fine and a ten-year bar to several forms of relief from deportation.

Withdrawal — An arriving alien's voluntary retraction of an application for admission to the United States in lieu of a removal hearing before an immigration judge or an expedited removal. Withdrawals are not included in nonimmigrant admission data.
